<<免疫学>>

内容概要

Efficiently master key immunology principles! State-of-the-art coverage brings you all of the latest scientific and clinical knowledge, including a new chapter on the use of antibodies and cytokines in immunotherapy. Crystal-clear illustrations, detailed clinical cases, and a user-friendly presentation make immunology remarkably easy to understand. And now, online access via STUDENT CONSULT makes this an even more effective learning resource!

书籍目录

SECTION 1 Introduction 1.Introduction to the Immune System 2.Basic Concepts and Components of the Immune System
SECTION 2 Antigen-Recognition Molecules 3.Introduction to Antigen Recognition 4.Antigens and Antibody Structure 5.Antibody-Antigen Interaction 6. Antibody Diversity 7. The T-cell Receptor 8.Major Histocompatibility Complex 9.Review of Antigen Recognition
SECTION 3 Physiology 10.Antigen Processing and Presentation 11.Lymphocyte Activation 12.Hematopoiesis 13.The Organs and Tissues of the Immune System 14. B-Cell Development 15.T-Cell Development 16.Cell-Cell Interaction in Generating Effector Lymphocytes 17.Immunologic Memory 18.A Brief Review of Immune Physiology
SECTION 4 Innate Immunity
SECTION 5 Immune System in Health and Disease
Glossary Index
