<<Turnbull产科学Turnbul>>

内容概要

A comprehensive account of modern obstetrics, Turnbull's Obstetrics 3rd Edition will build on the solid reputation of the first two Editions to provide a definitive account of all aspects of obstetrics in a text aimed primarily at specialist registrars and other obstetricians in training world wide. Over 60 contributors from UK, Europe, and the Far East provide chapters on every aspect of obstetric care. A new Editor, Professor Philip Steer of London, joins Geoffrey Chamberlain, in updating the existing Edition.

书籍目录
