<<麻醉药理学>>

内容概要

Winner 2004 BMJ Book Prize Evers Maze's beautifully illustrated text of pharmacology and physiology won the coveted 2004 BMJ Book Prize for the year's best all-round publication in Anaesthesia. The book, which is the essential companion to "Miller's Anesthesia" (ISBN: 0443066566), is an innovative resource especially designed for use by clinicians wanting to enhance their understanding of the mechanisms of drug action and find a framework from which they can approach the use of new drugs in practice, and is also an invaluable text for board preparation and recertification.
