

<<Cluster and Classifi>>

图书基本信息

书名：<<Cluster and Classification Techniques for the Biosciences 生命科学中的群集技术与分类技术>>

13位ISBN编号：9780521618007

10位ISBN编号：0521618002

出版时间：2007-1

出版时间：Cambridge Univ Pr

作者：Alan H. Fielding

页数：246

<<Cluster and Classifi>>

内容概要

Recent advances in experimental methods have resulted in the generation of enormous volumes of data across the life sciences. Hence clustering and classification techniques that were once predominantly the domain of ecologists are now being used more widely. This book provides an overview of these important data analysis methods, from long-established statistical methods to more recent machine learning techniques. It aims to provide a framework that will enable the reader to recognise the assumptions and constraints that are implicit in all such techniques. Important generic issues are discussed first and then the major families of algorithms are described. Throughout the focus is on explanation and understanding and readers are directed to other resources that provide additional mathematical rigour when it is required. Examples taken from across the whole of biology, including bioinformatics, are provided throughout the book to illustrate the key concepts and each technique's potential.

<<Cluster and Classifi>>

作者简介

Alan H. Fielding is Senior Lecturer in the Division of Biology at Manchester Metropolitan University.

<<Cluster and Classifi>>

书籍目录

Preface page1. Introduction 2. Exploratory data analysis 3. Cluster analysis 4. Introduction to classification 5. Classification algorithms I 6. Other classification methods 7. Classification accuracy References. Index
