<<Evidence-based anaes>>

内容概要

This is a comprehensive volume on the theories and applications of evidence-based anesthesia and critical care. Arising from the internationally renowned Cochrane Collaboration - the global force in evidence-based medicine - this book will be an authoritative guide for anesthetists. As coordinators of the Cochrane Anaesthesia Review Group, the editors have gathered a formidable set of contributions from around the world. The first half of the book provides an introduction to evidence-based medicine and applies the principles to anesthesia and critical care, including critical appraisal, meta-analysis, interpreting results and controlling bias. The second half shows how to practice this in preoperative evaluation, regional and general anesthesia, postoperative pain therapy, critical care and acute medicine. Medical professionals working in anesthesia and surrounding specialties worldwide will find this book immensely useful.

<<Evidence-based anaes>>

作者简介

Ann M&oslash;ller is a specialist in anaesthesiology and co-ordinating editor of the Cochrane Anaesthesia Review Group. Her specific areas of research interest are evidence-based medicine, surgery, anaesthesia and smoking intervention.

书籍目录

Preface 1. Introducing evidence-based anaesthesia 2. How to define the questions 3. Developing a search strategy, locating studies and electronic databases 4. Retrieving the data John Carlisle 5. Critical appraisal and the presentation of study details 6. Outcomes 7. The meta-analysis of a systematic review 8. Bias in systematic reviews 9. The Cochrane Collaboration and the Cochrane Anaesthesia Review Group 10. Integrating clinical practice and evidence: how to learn and teach evidence-based medicine 11. Involving patients and consumers in health care and decision-making processes: nothing about us without us 12. Evidence-based medicine in the Third World 13. Preoperative anaesthesia evaluation 14. Regional anaesthesia versus general anaesthesia 15. Fluid therapy 16. Antiemetics 17. Anaesthesia for day case surgery 18. Obstetrical anaesthesia 19. Anaesthesia for major abdominal and urological surgery 20. Anaesthesia for paediatric surgery 21. Anaesthesia for eye, ENT and dental surgery 22. Anaesthesia for neurosurgery 23. Cardiothoracic anaesthesia and critical care 24. Postoperative pain therapy 25. Critical care medicine 26. Emergency medicine: cardiac arrest management, severe burns, near-drowning and multiple trauma Glossary of terms Index
