## 内容概要

Microsoft FrontPage is one of the most popular tools for creating Web pages and sites. It is particularly appealing to beginning and intermediate-level users who don't necessarily want to have to be experts in HTML or JavaScript in order to create a professional-looking Web site. Most users want to quickly learn only the most common, most important tasks involved in creating simple, well-designed Web sites. Written by the popular author, Rogers Cadenhead, Sams Teach Yourself Microsoft FrontPage in 24 Hours is designed precisely for this beginning-level user - somebody who doesn't want to become a FrontPage expert but just wants to get a Web site up as quickly and as smoothly as possible. The book covers the FrontPage features and techniques that are likely to be used on a beginner's Web page, and it is organized in a logical step-by-step order that reflects the natural progression a new Web page author will follow in developing a Web site with FrontPage. 作者简介： Rogers Cadenhead is the author of several books on the Internet, Java, and Web publishing, including Sams Teach Yourself Java in 24 Hours and How to Use the Internet. He also writes a trivia column for the Fort Worth Star-Telegram and Knight-Ridder News Service, and is publisher of the Web sites Cruel Site of the Day and the Drudge Retort.
