<<肿瘤药物回顾Cancer Medici>>

内容概要

Based on the material from the newly revised parent text, Holland-frei Cancer Medicing-6, this question-and-answer book provides a solid learning foundation and is an unmatched review source for the American board of internal Medicine Examination in Oncology and the in-service Examination in Surgical Oncology. Approximately 600 questions are featured with answers referenced to journal articles and other oncology books.

Key features of the include: thematic grouping of questions allowing the reader to devote energies to only those specific areas of concern or difficulty and a multiple choice style consistent with the approach of the American Board of internal Medicine Examination Oncology and the in-service Examination in Surgical Oncology.
