<<Division (平装)>>

内容概要

Welcome to Home Learning Tools

Home Learning Tools-Easy Wipe-off workbooks provide children with an entertaining way to practice important school skills. They were designed and developed in consultation with Edward Z. Tronick, Ph.D., Harvard School of Education, Chief of the Child Development Unit at Children's Hospital, Harvard Medical School. These workbooks offer a valuable learning experience adults and children can share.

The Easy Wipe-off Division Workbook will help children build confidence while mastering basic division facts, beginning with smaller numbers and building to larger numbers. The basic equations from  $1/1$  to  $100/10$  are included. Make sure the child understands the directions before beginning each page. Answers can be written in crayon, dry erase marker, or washable marker. The answers can be easily erased with a clean, dry cloth or tissue, so that each page can be practiced again and again.

length: (cm)27.6

width:(cm)20
