## <<Animal Explorers: A >>

### 内容概要

Who ' s climbing in that tree? A Sloth, silly! Who ' s that zipping by? A Kinkajou! Who has blue wings? A Blue Morpho Butterfly, of course! Adventurous children can take a walk through the jungles of the world, from South America and Africa to Asia and Australia, in this clever 3-D puzzle series titled, Animal Explorers. Beautiful full-color illustrations grace the spreads that capture the habitats of animals like toucans, leopards, bengal tigers, gorillas, and the odd-looking duck-billed platypus. And to add to the excitement, the book comes with 16 pop-out, stand-up animal pieces and a playmat so kids can create their own jungle adventures.
