<<Practical Aspects of>>

内容概要

This book constitutes the refereed proceedings of the 7th International Symposium on Practical Aspects of Declarative Languages, PADL 2005, held in Long Beach, CA, USA in January 2005. The 17 revised full papers presented together with the abstracts of 2 invited talks were carefully reviewed and selected from 36 submissions. All current aspects of declarative programming are addressed including implementational issues and applications in areas such as database management, active networks, software engineering, decision support systems, and music composition.

<<Practical Aspects of>>

书籍目录

Invited Talks
Building the World from First Principles: Declarative Machine Descriptions and Compiler Construction
Code Compression Papers
Functional Framework for Sound Synthesis
Specializing Narrowing for Timetable Generation: A Case Study
Character-Based Cladistics and Answer Set Programming
Role-Based Declarative Synchronization for Reconfigurable Systems
Towards a More Practical Hybrid Probabilistic Logic Programming Framework
Safe Programming with Pointers Through Stateful Views
Towards Provably Correct Code Generation via Horn Logical Continuation Semantics
A Provably Correct Compiler for Efficient Model Checking of Mobile Processes
An Ordered Logic Program Solver
Improving Memory Usage in the BEAM
Solving Constraints on Sets of Spatial Objects
Discovery of Minimal Unsatisfiable Subsets of Constraints Using Hitting Set Dualization
Solving Collaborative Fuzzy Agents Problems with CLP(\sim :D)
Improved Fusion for Optimizing Generics
The Program Inverter LR_{inv} and Its Structure
A Full Pattern-Based Paradigm for XML Query Processing
Type Class Directives
Author Index
