

<<应用并行计算>>

图书基本信息

书名：<<应用并行计算>>

13位ISBN编号：9783540437864

10位ISBN编号：354043786X

出版时间：2002-12

出版时间：1 edition (2002年8月1日)

作者：Juha Fagerholm

页数：612

内容概要

This book constitutes the refereed proceedings of the 6th International Conference on Applied Parallel Computing, PARA 2002, held in Espoo, Finland, in June 2002. The 50 revised full papers presented together with nine keynote lectures were carefully reviewed and selected for inclusion in the proceedings. The papers are organized in topical sections on data mining and knowledge discovery, parallel program development, practical experience in parallel computing, computer science, numerical algorithms with hierarchical memory optimization, numerical methods and algorithms, cluster computing, grid and network technologies, and physics and applications.

书籍目录

I Keynote Lectures Enabling Numerical and Software Technologies for Studying the Electrical Activity in Human Heart
Parallel Patient-Specific Computational Haemodynamics High Performance Computing, Computational Grid, and Numerical Libraries
Grid Computing: Enabling a Vision for Collaborative Research HPC-What Might the Future Hold?
Multi-physics and Multi-scale Modelling of Materials Processing Co-array Fortran for Full and Sparse Matrices
Measuring the Local Geometry of Valleys in Complex Energy Landscapes by Exhaustive Exploration: The Lid Method
An Overview of an Architecture Proposal for a High Energy Physics GridII
Datamining and Knowledge Discovery A Data Mining Architecture for Clustered Environments Automated Fitting and Rational Modeling Algorithm for EM-Based S-Parameter Data
A Proposal of High Performance Data Mining System A Quasi-Parallel Realization of the Investment Frontier in Computer Resource Allocation Using Simple Genetic Algorithm on a Single Computer
Parallelism in Knowledge Discovery TechniquesIII Parallel Program Development A New Approach to Parallel Debugger Architecture
ALCOR-An Algorithmic Concept Recognition Tool to Support High Level Parallel Program Development MPIT-Communication/Computation Paradigm for Networks of SMP Workstations
Code Optimization Techniques of Data-Intensive Tasks onto Statically Scheduled Architectures: Optimal Performance on the TigerSharcIV
Practical Experiences in Parallel Computing PIT: A Library for the Parallelization of Irregular Problems
Parallel Information Retrieval with Query Expansion Reducing Communication Cost for Parallelizing Irregular Scientific Codes
Implementation of Parallel Collection Equi-Join Using MPI Practical Experiences in Parallelizing Existent Computer ProgramsV
Computer ScienceVI Numerical Algorithms with Hierarchical Memory OptimizationVII Numerical Methods and Algorithms AVIII Numerical Methods and Algorithms BIX
Numerical Methods and Algorithms CX Experiences with Cluster Computing AXI Experiences with Cluster Computing BXII Grid and Network TechnologiesXIII
Physics and ApplicationsAuthor Index
