<<Hundertwasser (平装)>>

内容概要

"His trump card is his art, the creator of beauty: of natural harmony, peace and joy. The extra-lucid power of his analytical sensitivity makes him the perfect decoder of global culture and its guided information. He reveals the prodigious quality resources of naturist empiricism against the abusive uniformity of rationalist totalitarianism, against the tyranny of ugliness and the iron rule of its straight line." Excerpt from: Pierre Restany, Hundertwasser, The Power of Art - The Painter-King with the five skins, Cologne, 1998, p. 94" --This text refers to the Hardcover edition.
