## <<Motor tecture Design>>

### 内容概要

This book focuses on the conflict between the two heroes of the 20th century ; the myth of cars lending mortals almost infinite mobility , and modern architecture and building art without which the automobile would not have been able to develop the way it has today.

This will be the first publication of its kind : containing the very best architectural examples illustrated in a highly informative and fascinating way with work from Audi , BMW , Mercedes-Benz , SAAB , Smart , Volkswagen , to name but a few.

with poetic texts , the publication will provide fascinating reading to all who are generally interested in architecture and cars.

作者简介 : Dirk Meyhofer , born in 1950 , is a freelance architect in Hamburg as well as a publicist and journalist in the areas of architecture and design.

He has written numerous publications including “ Design Structure and Poetry. Glass Architecture by Bothe Hadi Teherani ” , “ Rolf Heide ” 。
