内容概要

The Third World Organization for Women in Science (TWOWS) is an independent, non-profit, non-governmental body based at the offices of the Academy of Sciences for the Developing World (TWAS) in Trieste, Italy. The idea of setting up a Third World Organization for Women in Science was first discussed at the conference on The Role of Women in the Development of Science and Technology in the Third World, convened by the Canadian International Development Agency (CIDA) and TWAS in Trieste, Italy, during the period 3-7 October 1988. The participants of the conference, which included 218 leading women scientists and technologists from 63 Third World countries; recommended that a Study Group be set up to explore the possibility of creating an association/organization of women in science. Such a group was subsequently formed, and at its meeting in Trieste from 20-22 March 1989 it decided to establish Third World Organization for Women in Science and to adopt the constitution for the organization.

书籍目录

Foreword

Opening speeches

Speech by LU Yongxiang

Address by Kaiser Jamil

Opening remarks by Mohamed H. A. Hassan

Welcome remarks by David Ruth

Speech by WAN Gang

Speech by SONG Xiuyan

Opening speech by ZHOU Ji

Speech by DENG Nan

Address by GUO Jinlong

Address by CHEN Yiyu

Invited lectures

Women for science & science for development

Chinese women and China's science & technology

Genetic variant of CAT gene is associated with biomarker of
oxidative stress in Vitiligo

Address by the Minister of Science and Technology

Biological sagacity of pathogens: the biggest challenge to human
intelligence

From basic sciences to business model: medicinal and aromatic
plants in Mauritius

Recognition of arab women in science: a model of efforts in human
genetics
