

<<高维哈达码矩阵理论与应用>>

图书基本信息

书名：<<高维哈达码矩阵理论与应用>>

13位ISBN编号：9787030067821

10位ISBN编号：7030067827

出版时间：2006-7

出版时间：科学

作者：Yixian Yang

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<高维哈达码矩阵理论与应用>>

内容概要

111111

<<高维哈达码矩阵理论与应用>>

书籍目录

preface.

part i two-dimensional cases

chapter 1 walsh matrices

1.1 walsh functions and matrices

1.1.1 definitions

1.1.2 ordering

1.2 orthogonality and completeness

1.2.1 orthogonality

1.2.2 completeness

1.3 walsh transforms and fast algorithms

1.3.1 walsh ordered walsh-hadamard transforms

1.3.2 hadamard ordered walsh-hadamard transforms

bibliography

chapter 2 hadamard matrices

2.1 definitions

2.1.1 hadamard matrices

2.1.2 hadamard designs

2.1.3 williamson matrices

2.2 construction

2.2.1 general constructions

2.2.2 amicable hadamard matrices

2.2.3 skew hadamard matrices

2.2.4 symmetric hadamard matrices

2.3 existence

2.3.1 orthogonal designs and hadamard matrices

2.3.2 existence results

bibliography

part ii lower-dimensional cases

chapter 3 three-dimensional hadamard matrices

3.1 definitions and constructions

3.1.1 definitions

3.1.2 constructions based on direct multiplications

3.1.3 constructions based on 2-dimensional hadamard matrices

3.2 three-dimensional hadamard matrices of order $4k + 2$

3.3 three-dimensional hadamard matrices of order $4k$

3.3.1 recursive constructions of perfect binary arrays

3.3.2 quasi-perfect binary arrays

3.3.3 3-dimensional hadamard matrices based on $pba(2m, 2m)$ and $pba(3.2m, 3.2m)$

3.4 three-dimensional walsh matrices

3.4.1 generalized 2-dimensional walsh matrices

3.4.2 3-dimensional walsh matrices

3.4.3 3-dimensional pan-walsh matrices

3.4.4 analytic representations

bibliography..

chapter 4 multi-dimensional walsh-hadamard transforms

<<高维哈达码矩阵理论与应用>>

- 4.1 conventional 2-dimensional walsh-hadamard transforms
 - 4.1.1 2-dimensional walsh-hadamard transforms
 - 4.1.2 definitions of 4-dimensional hadamard matrices
- 4.2 algebraical theory of higher-dimensional matrices
- 4.3 multi-dimensional walsh-hadamard transforms
 - 4.3.1 transforms based on 3-dimensional hadamard matrices
 - 4.3.2 transforms based on 4-dimensional hadamard matrices
 - 4.3.3 transforms based on 6-dimensional hadamard matrices
- bibliography
- part iii general higher-dimensional cases
- chapter 5 n-dimensional hadamard matrices of order 2
 - 5.1 constructions of 2^n hadamard matrices
 - 5.1.1 equivalence between 2^n hadamard matrices and h-boolean functions
 - 5.1.2 existence of h-boolean functions
 - 5.1.3 constructions of h-boolean functions
 - 5.2 enumeration of 2^n hadamard matrices
 - 5.2.1 classification of 24 hadamard matrices
 - 5.2.2 enumeration of 25 hadamard matrices
 - 5.2.3 enumeration of general 2^n hadamard matrices
 - 5.3 applications
 - 5.3.1 strict avalanche criterion and h-boolean functions
 - 5.3.2 bent functions and h-boolean functions
 - 5.3.3 reed-muller codes and h-boolean functions
- bibliography
- chapter 6 general higher-dimensional hadamard matrices
 - 6.1 definitions, existences and constructions
 - 6.1.1 n-dimensional hadamard matrices of order 2^k
 - 6.1.2 proper and improper n-dimensional hadamard matrices
 - 6.1.3 generalized higher-dimensional hadamard matrices
 - 6.2 higher-dimensional hadamard matrices based on perfect binary arrays
 - 6.2.1 n-dimensional hadamard matrices based on pbas
 - 6.2.2 construction and existence of higher-dimensional pbas
 - 6.2.3 generalized perfect arrays
 - 6.3 higher-dimensional hadamard matrices based on orthogonal designs
 - 6.3.1 definitions of orthogonality
 - 6.3.2 higher-dimensional orthogonal designs
 - 6.3.3 higher-dimensional hadamard matrices from orthogonal designs
- bibliography
- concluding questions
- index...
