Doug Rosenberg, of ICONIX Software Engineering, Inc., has been providing system development tools and training for nearly two decades, with particular emphasis on object-oriented methods. He developed a Unified Booch/Rumbaugh/Jacobson design method in 1993 that preceded Rational's UML by several years. He has produced more than a dozen multimedia training courses on object technology, including COMPREHENSIVE COM and COMPLETE CORBA, and is the author of the book Use Case Driven Object Modeling with UML. Kendall Scott provides UML training and mentoring on a nationwide basis through ICONIX.
