

<<生长曲线模型及其统计诊断>>

图书基本信息

书名：<<生长曲线模型及其统计诊断>>

13位ISBN编号：9787030195326

10位ISBN编号：7030195329

出版时间：2007-1

出版时间：科学出版社

作者：潘建新,方开泰

页数：387

<<生长曲线模型及其统计诊断>>

内容概要

This book discusses the theory of a growth curve model (GCM) with particular emphasis on statistical diagnostics, which is mainly based on recent work on diagnostics made by the authors and their collaborators. This book is intended for researchers who are working in the area of theoretical studies related to the GCM as well as multivariate statistical diagnostics, and for applied statisticians working in application of the GCM to practical areas.

<<生长曲线模型及其统计诊断>>

书籍目录

Preface
 Acronyms
 Notation
 Chapter 1 Introduction 1.1 General Remarks 1.1.1 Statistical Diagnostics
 1.1.2 Outliers and Influential Observation 1.2 Statistical Diagnostics in Multivariate Analysis 1.2.1 Multiple
 Outliers in Multivariate Data 1.2.2 Statistical diagnostics in multivariate models 1.3 Growth Curve Model
 (GCM) 1.3.1 A Brief Review 1.3.2 Covariance Structure Selection 1.4 Summary 1.4.1 Statistical
 Inference 1.4.2 Diagnostics Within a likelihood Framework 1.4.3 Diagnostics Within a Bayesian
 Framework 1.5 Preliminary Results 1.5.1 Matrix Operation and Matrix Derivative 1.5.2 Matrix-variate
 Normal and t Distributions 1.6 Further Readings
 Chapter 2 Generalized Least Square Estimation 2.1 General
 Remarks 2.1.1 Model Definition 2.1.2 Practical Examples 2.2 Generalized Least Square Estimation
 2.2.1 Generalized Least Square Estimate (GLSE) 2.2.2 Best Linear Unbiased Estimate (BLUE) 2.2.3
 Illustrative Examples 2.3 Admissible Estimate of Regression Coefficient 2.3.1 Admissibility 2.3.2
 Necessary and Sufficient Condition 2.4 Bibliographical Notes
 Chapter 3 Maximum Likelihood Estimation 3.1
 Maximum Likelihood Estimation 3.1.1 Maximum Likelihood Estimate (MLE) 3.1.2 Expectation and
 Variance-covariance 3.1.3 Illustrative Examples 3.2 Rao's Simple Covariance Structure (SCS) 3.2.1
 Condition That the MLE Is Identical to the GLSE 3.2.2 Estimates of Dispersion Components 3.2.3
 Illustrative Examples 3.3 Restricted Maximum Likelihood Estimation 3.3.1 Restricted Maximum Likelihood
 (REMLs) estimate 3.3.2 REMLs Estimates in the GCM 3.3.3 Illustrative Examples 3.4 Bibliographical
 Notes
 Chapter 4 Discordant Outlier and Influential Observation 4.1 General Remarks 4.1.1 Discordant
 Outlier-Generating Model 4.1.2 Influential Observation 4.2 Discordant Outlier Detection in the GCM with
 SCS 4.2.1 Multiple Individual Deletion Model (MIDM) 4.2.2 Mean Shift Regression Model (MSRM)
 4.2.3 Multiple Discordant Outlier Detection 4.2.4 Illustrative Examples 4.3 Influential Observation in the
 GCM with SCS 4.3.1 Generalized Cook-type Distance 4.3.2 Confidence Ellipsoid's Volume 4.3.3
 Influence Assessment on Linear Combination 4.3.4 Illustrative Examples 4.4 Discordant Outlier Detection
 in the GCM with UC 4.4.1 Multiple Individual Deletion Model (MIDM) 4.4.2 Mean Shift Regression
 Model (MSRM) 4.4.3 Multiple Discordant Outlier Detection 4.4.4 Illustrative Examples.....
 Chapter 5
 Likelihood-Based Local Influence
 Chapter 6 Bayesian Influence Assessment
 Chapter 7 Bayesian Local
 Influence
 Appendix
