

<<整权与半整权模形式>>

图书基本信息

书名：<<整权与半整权模形式>>

13位ISBN编号：9787030330796

10位ISBN编号：703033079X

出版时间：2012-1

出版时间：科学出版社

作者：裴定一,王学理

页数：432

字数：400000

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<整权与半整权模形式>>

内容概要

Modular Forms with Integral and Half-Integral Weights focuses on the fundamental theory of modular forms of one variable with integral and half-integral weights. The main theme of the book is the theory of Eisenstein series. It is a fundamental problem to construct a basis of the orthogonal complement of the space of cusp forms; as is well known, this space is spanned by Eisenstein series for any weight greater than or equal to 2. The book proves that the conclusion holds true for weight $3/2$ by explicitly constructing a basis of the orthogonal complement of the space of cusp forms. The problem for weight $1/2$, which was solved by Serre and Stark, will also be discussed in this book. The book provides readers not only basic knowledge on this topic but also a general survey of modern investigation methods of modular forms with integral and half-integral weights. It will be of significant interest to researchers and practitioners in modular forms of mathematics.

书籍目录

- Chapter 1 Theta Functio and Their Traformation Formulae
- Chapter 2 Eisetin Series
 - 2.1 Eisetin Series with Half Integral Weight
 - 2.2 Eisetin Series with Integral Weight
- Chapter 3 The Modular Group and Its Subgroups
- Chapter 4 Modular Forms with Integral Weight or Half-integral Weight
 - 4.1 Dimeion Formula for Modular Forms with Integral Weight
 - 4.2 Dimeion Formula for Modular Forms with Half-Integral Weight
- References
- Chapter 5 Operato on the Space of Modular Forms
 - 5.1 Hecke Rings
 - 5.2 A Representation of the Hecke Ring on the Space of Modular Forms
 - 5.3 Zeta Functio of Modular Forms, Functional Equation, Weil Theorem
 - 5.4 Hecke Operato on the Space of Modular Forms with Half-Integral Weight
- References
- Chapter 6 New Forms and Old Forms
 - 6.1 New Forms with Integral Weight
 - 6.2 New Forms with Half Integral Weight
 - 6.3 Dimeion Formulae for the Spaces of New Forms
- Chapter 7 Cotruction of Eisetin Series
 - 7.1 Cotruction of Eisetin Series with Weight $> 5/2$
 - 7.2 Cotruction of Eisetin Series with Weight $1/2$
 - 7.3 Cotruction of Eisetin Series with Weight $3/2$
 - 7.4 Cotruction of Cohen-Eisetin Series
 - 7.5 Cotruction of Eisetin Series with Integral Weight
- References
- Chapter 8 Well Representation and Shimura Lifting
 - 8.1 Weil Representation
 - 8.2 Shimura Lifting for Cusp Forms
 - 8.3 Shimura Lifting of Eisetin Spaces
 - 8.4 A Congruence Relation between Some Modular Forms
- References
- Chapter 9 Trace Formula
 - 9.1 Eichler-Selberg Trace Formula on $SL_2(\mathbb{Z})$
 - 9.2 Eichler-Selberg Trace Formula on Fuchsian Groups
 - 9.3 Trace Formula on the Space $S_{k+1/2}(N, x)$
- References
- Chapter 10 Intege Represented by Positive Definite Quadratic Forms
 - 10.1 Theta Function of a Positive Definite Quadratic Form and

<<整权与半整权模形式>>

Its Values at Cusp Points

10.2 The Minimal Integer Represented by a Positive Definite
Quadratic Form

10.3 The Eligible Number of a Positive Definite Ternary
Quadratic Form

References

Index
