

<<色散管理光孤子的数学理论>>

图书基本信息

书名：<<色散管理光孤子的数学理论>>

13位ISBN编号：9787040182927

10位ISBN编号：7040182920

出版时间：2010-1

出版时间：高等教育出版社

作者：（印）比斯瓦斯，（塞尔）米洛维克，（美）马修 著

页数：161

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<色散管理光孤子的数学理论>>

### 内容概要

The book is intended for researchers and graduate students in Applied Mathematics, Physics and Engineering and also it will be of interest to those who are conducting research in nonlinear fiber optics.

<<色散管理光孤子的数学理论>>

书籍目录

1 IntroductionReferences2 Nonlinear Schrodinger's Equation 2.1 Derivation of NLSE 2.1.1 Limitations of conventional solitons 2.1.2 Dispersion-management 2.1.3 Mathematical formulation 2.2 Integrals of motion 2.3 Soliton perturbation theory 2.3.1 Perturbation terms 2.4 Variational principle 2.4.1 Perturbation terms References3 Polarization Preserving Fibers 3.1 Introduction 3.2 Integrals of motion 3.2.1 Gaussian pulses 3.2.2 Super-Gaussian pulses 3.2.3 Super-Sech pulses 3.3 Variational principle 3.3.1 Gaussian pulses 3.3.2 Super-Gaussian pulses 3.4 Perturbation terms 3.4.1 Gaussian pulses 3.4.2 Super-Gaussian pulses 3.5 Stochastic perturbation References4 Birefringent Fibers 4.1 Introduction 4.2 Integrals of motion 4.2.1 Gaussian pulses 4.2.2 Super-Gaussian pulses 4.3 Variational principle 4.3.1 Gaussian pulses 4.3.2 Super-Gaussian pulses 4.4 Perturbation terms 4.4.1 Gaussian pulses 4.4.2 Super-Gaussian pulses References5 Multiple Channels 5.1 Introduction 5.2 Integrals of motion 5.2.1 Gaussian pulses 5.2.2 Super-Gaussian pulses 5.3 Variational principle 5.3.1 Gaussian pulses 5.3.2 Super-Gaussian pulses 5.4 Perturbation terms 5.4.1 Gaussian pulses 5.4.2 Super-Gaussian pulses References6 Optical Crosstalk 6.1 In-band crosstalk 6.2 Gaussian optical pulse 6.2.1 Bit error rate 6.3 Sech optical pulse 6.4 Super-Sech optical pulse References7 Gabitov-Turitsyn Equation 7.1 Introduction 7.2 Polarization-preserving fibers 7.2.1 Special solutions 7.3 Birefringent fibers 7.4 DWDM system 7.5 Properties of the kernel 7.5.1 Lossless Case 7.5.2 Lossy Case References8 Quasi-linear Pulses 8.1 Introduction 8.2 Polarization-preserving fibers 8.2.1 Lossless system 8.2.2 Lossy system 8.3 Birefringent fibers 8.3.1 Lossless system 8.3.2 lossy system 8.4 Multiple channels 8.4.1 Lossless system 8.4.2 Lossy system References9 Higher Order Gabitov-Turitsyn Equations 9.1 Introduction 9.2 Polarization preserving fibers 9.3 Birefringent fibers 9.4 DWDM systems ReferencesIndex
