后记

章节摘录

版权页：插图：New modern technology brings numerous innovations to all fields, including accommdation and hospitality. One fantastic innovation is Self Check-in Kiosk deployed in hotels. Self Check-in Kiosk provides you with fast, convenient and efficient service. Both the hotel and you greatly benefit from this self-service system. Thanks to this intelligently designed and easy-to-interface system, the hotel has effective management of personnel and other resources at their property. For you, this system presents an image of friendly, fast and efficient service. The check-in procedure is very simple. What you need to do is to insert your valid credit card, then follow the on-screen instructions. You can locate and modify reservations, print room keys, view and print messages and receive basic information on hotel services via the kiosks. With this machine, you are very easy to locate amenities around a hotel property, such as identifying the best route to a guest room, pool, hotel restaurant or other services. Kiosks can accommodate and serve different language speakers in different languages. Once you leave the hotel, you will automatically be charged. Hyatt Hotels and Resorts is among the first premier hotel chains to deploy the new and advanced kiosk system as part of its overall lobby redesign moving forward. Integrated into the registration counter, the kiosks have made an immediate impact on customer satisfaction.
