

<<医学生物学实验>>

图书基本信息

书名：<<医学生物学实验>>

13位ISBN编号：9787040334333

10位ISBN编号：704033433X

出版时间：2012-1

出版时间：高等教育出版社

作者：侯燕芝 编

页数：124

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<医学生物学实验>>

### 内容概要

《医学生物学实验（英文版）》由2部分组成。

第一部分概括地介绍医学生物学实验的目的、实验室规范、实验安全、常用实验室仪器、实验方法以及实验数据的评价。

第二部分包括25个实验，包括生物分子的分析、细胞和超微结构的分析、分子生物学实验、医学遗传学实验、实验技术在医学研究中的应用等。

书中所介绍的所有实验都是经过验证的，而且学生在正常实验课期间均可完成。

## 书籍目录

Chapter1 Introduction to the Medical Biology Laboratory 11 Objectives of a Teaching Medical Biology Laboratory  
12 Laboratory Rules 13 Laboratory Safety 14 Common Laboratory Equipments 15 Experimental Methods in Medical Biology  
16 Evaluation of Experimental Data and Laboratory Reports  
Chapter 2 Experiments in Medical Biology  
Experiment 1 The Use of Glass Pipets and Pipettors  
Experiment 2 Amphoteric Ionization and Isoelectric Point Determination of Proteins  
Experiment 3 Quantitative Determination of Protein Concentrations by Coomassie Brilliant Blue G250 Assay  
Experiment 4 Quantitative Determination of Proteins by Folin-phenol Assay  
Experiment 5 Determination of Proteins by UV Absorption  
Experiment 6 Separation of Amino Acid Mixtures by Ion-exchange Chromatography  
Experiment 7 Separation of Serum  $\gamma$ -globulins by Ion-exchange Chromatography  
Experiment 8 Separation of Serum Proteins by Cellulose Acetate Membrane Electrophoresis  
Experiment 9 Separation and Purity Determination of Serum  $\gamma$ -globulins by SDS-polyacrylamide Gel Electrophoresis  
Experiment 10 Determination of Serum Glutamicpyruvic Transaminase Activity  
Experiment 11 Determination of Serum Urea Nitrogen Content  
Experiment 12 Determination of Blood Glucose Concentration  
Experiment 13 Subculture of Adhesion Cells  
Experiment 14 Counting and Determination of Live/Dead Cells  
Experiment 15 Preparation of Cell Samples for Observation of Cell Morphologies  
Experiment 16 Mitosis and Meiosis of Cells  
Experiment 17 Intracellular Distribution of Biomacromolecules  
Experiment 18 Isolation of Subcellular Components  
Experiment 19 Preparation of Chromosome Samples from Mouse Bone Marrow Cells  
Experiment 20 Banding Pattern of Human Chromosomes  
Experiment 21 Colony Forming Efficiency and Total Protein Analysis of Tumor Cells  
Experiment 22 Isolation, Amplification and Identification of the p53 Gene Fragment from Mouse Liver Cells  
Experiment 23 Purification of Target DNA and Generation of Recombinant DNA  
Experiment 24 Transformation and Screening of Recombinant DNA  
Experiment 25 Determination of Serum Proteins Using Western Blotting
