

图书基本信息

书名：<<高速网络与因特网性能与服务质量（英文版 第2版）>>

13位ISBN编号：9787111098973

10位ISBN编号：7111098978

出版时间：2004-1-1

出版时间：机械工业出版社

作者：William Stallings

内容概要

This book is intended for both a professional and an academic audience. For the professional interested in this field, the book serves as a basic reference volume and is suitable for self-study. A

书籍目录

- part one background
 - chapter 1 introduction
 - chapter 2 protocols and the TCP/IP suite
 - chapter 3 TCP and IP
- part two high-speed networks
 - chapter 4 frame relay
 - chapter 5 asynchronous transfer mode
 - chapter 6 high-speed lans
- part three performance modeling and estimation
 - chapter 7 overview of probability and stochastic process
 - chapter 8 queuing analysis
 - chapter 9 self-similar traffic
- part four congestion and traffic management
 - chapter 10 congestion control in data networks and internets
 - chapter 11 link-level flow and error control
 - chapter 12 TCP traffic control
 - chapter 13 traffic and congestion control in ATM networks
- part five internet routing
 - chapter 14 overview of graph theory and least cost paths
 - chapter 15 interior routing protocols
 - chapter 16 exterior routing protocols and multicast
- part six quality of service in ip networks
 - chapter 17 integrated and differentiated services
 - chapter 18 protocols for qos support
- part seven compression
 - chapter 19 overview of information theory
 - chapter 20 lossless compression
 - chapter 21 lossy compression
