内容概要

Capacity Building for the Rapid Commercialization of Renewable Energy in China (Project CPR/97/G31) was financed by Global Environment Facility (GEF), Australian government and Netherlands government, and was jointly implemented by the Government of China and the United Nations Development Programme (UNDP). Through the introduction of advanced experience and technology of international renewable energy development, the project aims to speed up the commercialization of Chinese renewable energy development. The project was of great significance to the rapid development of renewable energy in China. The series of books have summed up the achievements of the project, which are suitable for all those who are interested in Chinese renewable energy development.

书籍目录

Part Biogas Project of Livestock and Poultry Farms Chapter 1 Introduction Chapter 2 Preparation of Biogas Project Development Chapter 3 Basic Knowledge of Biogas Fermentation Chapter 4 Process Technologies of Biogas Project Chapter 5 Engineering Technologies of Biogas Project Chapter 6 Operation, Management and Maintenance of Biogas Project Chapter 7 Introduction of Typical Cases Part Light Industry Biogas Project Chapter 8 Background of Biogas Project Development with Organic Wastewater of Light Industry Chapter 9 Preparation of Biogas Project Development Chapter 10 Project Examination and Approval and Project Financing Chapter 11 Implement and Management of Project Chapter 12 Development of Biogas Engineering Technology Chapter 13 Selection of Biogas?Project Process (Case StudiesAttached) Chapter 14 Commissioning , Operation and Management of theProjects Acronyms References
