原文附录二 模拟试题参考答案附录三 真题听力原文及答案附录四 大学英语三级核心词汇表

章节摘录

Directions : After reading the following passage , you will find 5 questions or unfinished statements , numbered 41 through 45. For each question or statement there are 4 choices marked A , B , C and D. You should make the correct choice and mark the corresponding letter on the Answer Sheet with a single line through the center. Do you forget to turn off the lights and heaters when you go out of a room ?

In 2040 it will not matter. They will turn themselves off and on again when you return. You will choose the temperature for each room , the lighting and the humidity. A sensor will detect the presence of a human (and , with luck , ignore the dog !

) And turn the systems on , and when the humans leave it will turn them off again. The sensors will work through the central home computer , and they will do much more than just turn the fires and lights on and off for you. They will detect faulty electrical appliances , plugs or switches , isolate them so that they cannot harm anyone , and then warn you that they need repair. They will detect fire and if you are out of the house , the computer will call the fire brigade. It will also call the police should the sensors detect an intruder (入侵者) . This will not be too difficult because the locks on the outside doors will be electronic. You will open them using your personal card—the one you use for shopping—maybe using a number known only to you. It will be impossible to lose the key , and a housebreaker will have to tamper (拨弄) with the lock or with a window. It is not very difficult to make such tampering send a signal to the computer. The computer will be more helpful than a fireman-policeman-servant. It will be an entertainer , and , most of your entertainment will come right into your home. It does now , of course , but by 2040 "entertainment" will mean much more. For one thing , you will be able to take part actively , rather than just watching.
