## <<当代世界经济>>

### 前言

世界经济课程是目前国内各高校经济类学科的一门重要课程。

目前世界经济教材从体系上讲有两种类型，一类是以国外的国际经济学为主要内容，包括国际贸易和国际金融两部分；另一类是国内体系。

由于国内的学科分类将国际贸易与国际金融分为两个不同的专业，因此世界经济国内体系希望能与国际经济学讲授的内容有所不同，形成自己独立的体系和特色。

本教材即是在这样的考虑下，抓住当代世界经济发展中经济全球化这一主线，既从全球的角度又从区域、国家和企业的角度考察在经济全球化背景下世界经济发展和变化的规律。

本教材还在教法上注重对学生主动性、创造性和实践性学习的培养，形成了在教材内容和教学方法上的特色，具体说来主要特色如下。

在教材体系安排上以经济全球化为贯穿全书的主线，重点突出经济全球化的特点、发展脉络；对区域经济、国民经济和企业的影响，主要包括：当代世界经济与发展历程、世界经济发展的推动力、经济全球化时代、区域经济一体化、贸易自由化——经济全球化的先驱、金融全球化、经济可持续发展的挑战、国际合作与协调、经济全球化中的世界可过经济和中国经济改革及其与世界经济的融合。

## <<当代世界经济>>

### 内容概要

在教材体系安排上以经济全球化为贯穿全书的主线，重点突出经济全球化的特点、发展脉络；对区域经济、国民经济和企业的影响，主要包括：当代世界经济与发展历程、世界经济发展的推动力、经济全球化时代、区域经济一体化、贸易自由化——经济全球化的先驱、金融全球化、经济可持续发展的挑战、国际合作与协调、经济全球化中的世界各国经济和中国经济改革及其与世界经济的融合。

教材内容紧跟当前世界经济发展的最新事件，采用最新的统计数据。

为了达到培养国际化复合型人才的目的，本教材有中英文对照两个版本，其中，英文版本将是我国首部用英语编写的国内体系的世界经济教材。

使用英语教学可以使学生大大提高应用英语学习经济课程的能力，为今后从事国际经济事务做准备。为了方便学生的学习，英文版本课文中对较难的词、句进行了中文注释，并在每章后面附有中文的本章小结，同时还有一本中文对照翻译版本。

本教材适用于经济类专业研究生、本科生的学习，并经过8轮课堂试讲，受到学生的好评。

## 章节摘录

**插图：Problems and Challenges** In the process of the world economic development, there have been all sorts of formidable problems undermining the healthy development of the world economy. In today's world, the environmental problems, poverty, fatal pandemic diseases, desertification etc. have been the major threat to the people of all nations. To recognize the economic implication of the challenges to the people's well being and to find effective measures to address the problems are the important tasks of the course.

### 1.1.3 The Three Elements of the World Economy

People are the controlling force of the world economy. The reason why people can take the controlling position in the world economy is largely attributed to its dual features: one is the people as a basic production factor and the other is the people as the consumer. For surviving purpose and higher level of satisfaction of various demands, human labor, a basic input of production, makes the production possible by its working on the natural resources with certain skills; while on the other hand, people keep consuming those products, demanding for more products and coming up with new consumption desires. Human being's increasing desire for better life drives it to work harder and has become the most dynamic force behind the economic development. Thus the development of the world economy is hand in hand with the growing number of the human population. The sustainability of the economic development depends on the balance between the growing size of the population, ecological environment and the natural resources. For centuries, the growth rate of human population was slower than required by a fast economic development; therefore the expansion of the world economy was restrained as a result. However, in the last two centuries, the number of human population has increased at an unprecedented speed, which is demonstrated by the shorter and shorter period required for doubling time of total population. Doubling time, as the name suggests, is a measure of how long it will take the population of an area to grow to twice its current size. For example, a country whose population increases at 1.8% per year will have doubled in about 40 years.
