<<EDUCATIONAL PHILOSOPHY>>

内容概要

The crucial foundation that enhances educational quality, cultivates talents and promotes scientific development of education is based on the improvement of both teaching practice and leadership of experienced educators. What are the qualities required of educators in contemporary context? What is their pathway to success? How can they exert their modeling influence at a maximal level? How should school administrators improve themselves to become real educators? I believe you will find enlightening answers to all these questions after you read this book.

书籍目录

Tell you a do-not-know
My working experience with Principal
My teacher--
Liu Pengzhi
RDFZ's Principal Liu Pengzhi: " engraving the calling of education into my life " Liu Pengzhi: Beyond Borders

章节摘录

Chapter 1 Liu Pengzhi's Educational Ideas Love is the highest level of education "A human life is created for a purpose," says the famous Chinese educator Mr. Tao Xingzhi. What is the major purpose of my life? In my youth, my dream was to become a scientist. Because of the circumstances of that time and perhaps due to fate, I embarked on a journey in education. My life has been connected to education ever since. While I was teaching, the major purpose of my life was to become a good teacher; now that I am a principal, my life is focused on being a good principal. My youth and all my learning have been dedicated to this major purpose of my life.

According to Mencius, three types of "extreme happiness" exist in a person's life: 1. having both parents alive and siblings doing well; 2. possessing no remorse or shame when facing judgment from above and below; 3. attracting talents and educating them. I have enjoyed all of the above extreme happiness so my life is happy. I am a person of happiness. Love is the highest level of education and epitomizes a natural flow of dedication. Respect embodies the quintessence of education and bolsters the drive for creativity.
