章节摘录

版权页： The Kennedy Center presents music, dance, plays and other performances. The full name is the John F. Kennedy Center for the Performing Arts. The idea began with legislation signed by President Dwight Eisenhower in nineteen fifty-eight to create a National Cultural Center. The building opened in nineteen seventy-one as a memorial to John Fitzgerald Kennedy, the thirty-fifth president. He and his wife, Jacqueline, strongly supported the arts. Architect Edward Durrell Stone designed a simple white building that overlooks the Potomac River. The Kennedy Center has several performing areas. The Concert Hall is the largest. The National Symphony Orchestra performs there. So do popular entertainers. The Washington Opera, ballets and musical comedies are performed in the Opera House. Plays and some opera and dance productions take place in the Eisenhower Theater. Smaller theaters in the Kennedy Center present music groups and plays. The Family Theater presents performances for young people. Each year more than four hundred performances are offered free of charge by local, national and international artists. Over the years, some of the world's top artists have performed at the Kennedy Center. Many special events also take place there. These have included a month-long celebration of the traditional and modern arts of China. They have also included an exploration of the culture of twenty-two Arab nations. The Kennedy Center also serves as an educational headquarters. It supports and teaches people about the performing arts in America. It creates programs for teachers and students of all ages. It supports competitions and training programs for students. And it pays young performing artists to create new works. Q13: Who signed the legislation to create a National Cultural Center? Q14: Which area is the largest performance space in the Kennedy Center?
