<<活动目录参考手册(影印本)>>

内容概要

本书是ACTIVE DIRECTORY DEVELOPER'S REFERENCE LIBRARY (活动目录编程和开发影印丛书)中的一本,是关于Active Directory (活动目录)的参考书,内容包括常量、结构、函数、接口和返回值等。

论述了轻量级目录访问协议(LDAP)的微软实现方案。

LDAP是一个行业标准的目录服务协议,为连接、查找和修改Internet目录提供了一种机制。

LDAP API简化了Internet目录服务应用程序的编写,这些应用程序可以运行在各种LDAP兼容目录服务上,包括活动目录服务。

书籍目录

- Contents
- Acknowledgements
- part 1
- Chapter 1: Using the Active Directory Library
 - How the Active Directory Library Is Structured
 - How the Active Directory Library Is Designed
- Chapter 2: What's In This Volume?
- Active Directory Reference
- Chapter 5: Active Directory Functions
- Chapter 6: Active Directory Structures
- Chapter 7: Active Directory Interfaces
- Chapter 8: Active Directory Constants
- Chapter 9: Active Directory Return Values
- LDAP Reference
- Chapter 10: About the LDAP API
- Chapter 11: Using LDAP in a Client Application
- Chapter 12: LDAP Functions
- Chapter 13: LDAP Structures
- Chapter 14: LDAP Session Options and Return Values
- Chapter 3: Using Microsoft Reference Resources
 - The Microsoft Developer Network
 - Comparing MSDN with MSDN Online
 - MSDN Subscriptions
 - MSDN Library Subscription
 - MSDN Professional Subscription
 - MSDN Universal Subscription
 - Purchasing an MSDN Subscription
 - Using MSDN
 - Navigating MSDN
 - Quick Tips
 - Using MSDN Online
 - Navigating MSDN Online
 - MSDN Online Features
 - MSDN Online Registered Users
- The Windows Programming Reference Series
- Chapter 4: Finding the Developer Resources You Need
 - Developer Support
 - Online Resources
 - Learning Products
 - Conferences
 - Other Resources
 - Part 2
 - Chapter 5: Active Directory Functions
 - Active Directory Display Functions
 - Domain Controller and Replication Management Functions

Directory Service Functions
Directory Backup Functions
Chapter 6:Active Directory Structures
Active Directory Display Structures
Domain Controller and Replication Management Structures
Directory Service Structures
Directory Backup Structures
Object Picker Dialog Box Structures
Chapter 7:Active Directory Interfaces
Active Directory Admin Interfaces
Active Directory Display Interfaces
Object Picker Dialog Box Interfaces
Chapter 8:Active Directory Constants
User Interface Object Flags
GUIDs of User Interface Elements
Messages Communicated Through User Interfaces
Chapter 9:Active Directory Return Values
Success
Active Directory Backup Errors
Active Directory System Errors
Directory Manager Errors
Active Directory Logging and Recovery Errors
Chapter 10:About the LDAP API
Differences Between LDAP 2 and LDAP 3
New Run-Time Features for Window 2000
What Is LDAP?
The LDAP Directory Service Model
What Is a Directory Service?
Directory Entries
Accessing Directory Information
LDAP and ADSI
Chapter 11:Using the LDAP API in a Client Application
Establishing an LDAP Session
Authenticating the Client
Modifying a Directory Entry
Example Code for Adding a New Directory Entry
Searching a Directory
Processing Search Results
Paging Search Results
Sorting Search Results
Managing Memory
Closing a Connection
Synchronous vs. Asynchronous Calls
Using Controls
Extended Operations
Compiling and Linking
Chapter 12:LDAP Functions

LDAP Functions

Chapter 13:LDAP Structures

Data Structures

Chapter 14:LDAP Session Options and Return Values

LDAP Session Options

LDAP Return Values

Part 3-Glossary and Indexes

Glossary

Index 1:Active Directory Programmer's Guide Coverage

Index 2:Active Directory Reference-Alphabetical Listing

Index 3:ADSI,ADSI Exchange,and Group Policy Programmer's Guides

Coverage

Index 4:ADSI Reference-Alphabetical Listing
