

<<先进磁性材料手册第3卷>>

图书基本信息

书名：<<先进磁性材料手册第3卷>>

13位ISBN编号：9787302086062

10位ISBN编号：7302086060

出版时间：2005-7

出版时间：清华大学出版社

作者：塞尔米厄,

页数：354

<<先进磁性材料手册第3卷>>

内容概要

本书的目的是对磁性材料研究的新近进展提供一种全面的理解。

本书共分四卷，每一卷集中论述一个具体的研究领域。

每一章首先对该章的基本概念和重要观念进行阐述，然后从实验和理论方面进行详细地说明，最后介绍该领域的发展前景以及新的思想。

书中提供了详尽的参考文献，可供研究人员参考。

每种新磁性材料的开发成功都取决于它的性能与成本。

在正确的磁理论建立后，如何使用最合适的制作加工工艺是开发制造新磁性材料的关键。

第3卷对近年来各种磁性材料的制作加工原理和性能的相关性进行分析总结并瞻望未来。

本书的读者对象为研究生和相关专业的研究人员。

书籍目录

ForewordPrefaceList of Contributors1 HDDR Processfor the Production of High Performance Rare-Earth Magnets 1.1 Introduction1 1.2 HDDR Phenomena in Nd₂Fe₁₄B3 1.2.1 Hydrogen Absorption4 1.2.2 Disproportionation in Nd₂Fe₁₄B4 1.2.3 Recombination of Disproportionated Nd₂Fe₁₄B8 1.3 Anisotropy in HDDR Treated Nd₂Fe₁₄B Magnets11 1.4 HDDR Phenomena in Other Rare-Earth Magnetic Materials21 1.4.1 Sm₂Fe₁₇N_x Compound21 1.4.2 ThMn₁₂ Type Compound23 1.4.3 Nd₃(Fe, Ti)₂₉ Type Compound24 1.5 Summary25 References 252 Process and Magnetic Properties of Rare-Earth Bonded Magnets32 2.1 Introduction32 2.2 Recent Progress on Rare-Earth Magnetic Powders for Bonded Magnets34 2.2.1 Isotropic NdFeB Powders34 2.2.2 Lean Neo Isotropic Powders38 2.2.3 Anisotropic NdFeB Powders for Bonded Magnets39 2.2.4 SmCo Powder for Bonded Magnet Applications40 2.2.5 Other Magnetic Powders43 2.3 Process and Magnetic Properties of Polymer Bonded Rare Earth Magnets44 2.3.1 Bonded Magnets Produced by Compression Molding Process44 2.3.2 Hot Compression Molding Process49 2.3.3 Bonded Magnets Produced by Injection Molding Process52 2.3.4 Bonded Magnets Produced by Extrusion Process53 2.4 Polymers and Polymer Additives for Bonded Rare-Earth Magnets55 2.5 Environmental Stability of Polymer Bonded Magnets57 2.6 Summary61 References653 Laser Processing of Magnetic Materials69 3.1 Introduction69 3.2 Laser Characteristics and Laser Facilities for Materials Processing70 3.2.1 Laser Characteristics70 3.2.2 Lasers Available for Materials Processing71 3.2.3 Laser Materials Interaction74 3.3 Laser Surface Treatment of Magnetic Thin Films74 3.3.1 Precise Grain Size Control of Magnetic Thin Films75 3.3.2 Alignment of Magnetic Grains by Laser Annealing78 3.4 Interferometric Laser Lithography79 3.4.1 Multi-Step ILL80 3.4.2 Direct Patterning Using ILL82 3.5 Concluding Remarks85 References854 Processing and Properties of Nanocomposite Nd₂Fe₁₄B-Based Permanent Magnets88 4.1 Introduction88 4.2 Basic Considerations on Processing Techniques88 4.3 Preparation of Amorphous or Nanostructured Precursors91 4.4 Transformation of Amorphous or Nanostructured Precursors97 4.5 Direct Preparation of Nanocomposite Permanent Magnets99 4.6 Effects of Additive Elements on Crystallization Behavior100 4.6.1 Fe₃B/Nd₂Fe₁₄B101 4.6.2 Advanced Nanocomposite Permanent Magnets Based on Fe₃B/Nd₂Fe₁₄B103 4.6.3 Nd₂Fe₁₄B/Fe104 4.7 Practical Properties of Nanocomposite Nd₂Fe₁₄B-Based Magnets106 4.7.1 Magnetic Properties106 4.7.2 Corrosion Behaviors107 4.7.3 Magnetizability108 4.8 Application Examples109 4.9 Future Subjects110 References115 Amorphous and Nanocrystalline Soft Magnetic Materials: Tailoring of Magnetic Properties, Magnetoelastic and Transport Properties1156 Nanogranular Layered Magnetic Films1827 Monodisperse Ferromagnetic Metal Particles: Synthesis by Chemical Routes, Size Control and Magnetic Characterizations2178 Monocrystalline Half-Metallic NiMnSb Thin Films: Preparation and Characterization2679 Bulk Amorphous Magnetic Materials303Index353
