

## <<确定性系统的统计性质>>

### 图书基本信息

书名：<<确定性系统的统计性质>>

13位ISBN编号：9787302182962

10位ISBN编号：7302182965

出版时间：2008-11

出版时间：清华大学出版社

作者：丁玖，周爱辉 编著

页数：236

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<确定性系统的统计性质>>

### 内容概要

本书介绍的是确定性离散动力系统统计性质的基本理论与计算方法，首先介绍了遍历理论的一些经典结果；然后着重研究了对应于混沌映射的绝对连续不变测度的存在性与计算问题，这归结于相应的Frobenius—Perron算子的泛函分析与数值分析；最后本书介绍了Shannon熵、Kolmogorov熵、拓扑熵以及Boltzmann熵，并给出了不变测度的一些最新应用。本书可作为数学、计算科学及工程专业的研究生教材或参考书。

<<确定性系统的统计性质>>

书籍目录

Chapter 1 Introduction 1.1 Discrete Deterministic Systems—from Order to Chaos 1.2 Statistical Study of Chaos Exercises

Chapter 2 Foundations of Measure Theory 2.1 Measures and Integration 2.2 Basic Integration Theory 2.3 Functions of Bounded Variation in One Variable 2.4 Functions of Bounded Variation in Several Variables 2.5 Compactness and Quasi—compactness 2.5.1 Strong and Weak Compactness 2.5.2 Quasi-Compactness Exercises

Chapter 3 Rudiments of Ergodic Theory 3.1 Measure Preserving Transformations 3.2 Ergodicity, Mixing and Exactness 3.2.1 Ergodicity 3.2.2 Mixing and Exactness 3.3 Ergodic Theorems 3.4 Topological Dynamical Systems Exercises

Chapter 4 Frobenius-Perron Operators 4.1 Markov Operators 4.2 Frobenius—Perron Operators 4.3 Koopman Operators 4.4 Ergodicity and Frobenius—Perron Operators 4.5 Decomposition Theorem and Spectral Analysis Exercises

Chapter 5 Invariant Measures—Existence 5.1 General Existence Results 5.2 Piecewise Stretching Mappings 5.3 Piecewise Convex Mappings 5.4 Piecewise Expanding Transformations Exercises.

Chapter 6 Invariant Measures—Computation 6.1 Ulam ' s Method for One—Dimensional Mappings 6.2 Ulam ' S Method for N—dimensional Transformations 6.3 The Markov Method for One—Dimensional Mappings 6.4 The Markov Method for N—dimensional Transformations Exercises

Chapter 7 Convergence Rate Analysis 7.1 Error Estimates for Ulam ' S Method. 7.2 More Explicit Error Estimates 7.3 Error Estimates for the Markov Method Exercises

Chapter 8 Entropy 8.1 Shannon Entropy 8.2 Kolmogorov Entropy 8.3 Topological Entropy 8.4 Boltzmann Entropy 8.5 Boltzmann Entropy and Frobenius—Perron Operators Exercises

Chapter 9 Applications of Invariant Measures 9.1 Decay of Correlations 9.2 Random Number Generation 9.3 Conformational Dynamics of Bio—molecules 9.4 DS—CDMA in Wireless Communications Exercises

Bibliography  
Index
