<<大学英语快速阅读>>

前言

《大学英语快速阅读》是根据教育部颁发的《大学英语教学基本要求》以及大学英语四、六级考试最新题型而编写的。

改革后的大学英语考试题型更注重扫读和寻读能力的培养，并增加了阅读的篇幅，改进了阅读理解题型，要求学生在15分钟之内完成约1000字文章的阅读量。

传统的阅读教材在阅读篇幅、阅读时间以及阅读理解题型方面都很难满足新的要求。

为了适应大学英语四、六级考试的新变化，我们及时编写了《大学英语快速阅读》教材。

本教材有以下几个特点：首先是紧扣最新变化，无论是阅读篇幅还是题型都严格按最新大学英语四级考试要求编写。

其次是选材多样，内容新颖，信息量大，所选短文全部是近两年英美正式发表的，以介绍英美社会、人文、习俗等背景知识为主，每单元以一个话题为中心。

我们的编写宗旨不以应试为目的，而在于给学生提供高质量的英语阅读文章，使学生在愉快的阅读中，欣赏美文，开阔视野，并在不知不觉中掌握阅读技能，尤其是快速阅读技能。

最后，本教材适合于课堂和自学两种教学模式。

每单元由四篇文章组成，前两篇为课内阅读，由教师按规定的时间随堂练习，有计划、有步骤地培养学生的阅读技能；后两篇文章为课后阅读，可作为课后作业和学生自主学习的材料，进一步强化和巩固课内所学的知识。

相信通过学习本教材，学生能更迅速和更有效地掌握英语阅读技能。

本教材由武汉大学外语学院大学英语部负责编写。

第四册由汪火焰主编，阮琳、陈金兰参编。

由于编者水平和经验有限，且时间紧迫，教材中难免还有不足之处，热切期望广大读者不吝指正。

。

 Passage What to Do about Asia's Savings?
 After-Class Reading Passage I If Minimum Wage Is Raised, Who Benefits?
 Passage Economy Grew at a Slower Pace, According to New Fed Snapshot
 Keys to Fast Reading(Book Four)

章节摘录

In the years since high-tech earthmoving machine made mountain topping increasingly attractive to the energy industry, more and more of West Virginia's total production of coal—some 154 million tons in 2004—has come from its cutting the tops of highlands. Relative to Western coal (Wyoming is the nation's top coal producer), second ranked West Virginia's low-sulfur bituminous burns with a cleaner, hotter efficiency in the electric power plants of America. And taxes from bituminous coal help fuel a large part of the state's economy.⁸

But some West Virginians have been paying a hurtful price for their state's good fortune—and the coal industry's cost-cutting efficiency. In 1948 some 125,000 men worked in the mines of West Virginia. By 2005 there were fewer than 19,000, and most of these were employed in underground mines. Nowadays, it just doesn't take many hands to struggle to get coal off the top of a mountain.⁹ Consider, for example, the Big Coal River community of Sylvester, where fewer than 20 of its 195 longtime residents are employed in mining or related services. And consider Sylvester.¹⁰ **NOT FIT TO DRINK** Kenneth Stroud blames the poisonous soup flowing from the tap in his home in Rawl for illness affecting his sons and him. Stroud and some 350 other area residents are suing Massey Energy, claiming that by storing coal sludge in old mine shafts it made well water dirty, a charge the company denies. Not far from Rawl, polluted water (top) flowing down a slope above Pigeon Creek is blamed on seepage from a coal refuse impoundment owned by Arch, a statement also denied.
