

<<概率论>>

图书基本信息

书名：<<概率论>>

13位ISBN编号：9787308045346

10位ISBN编号：730804534X

出版时间：2005-11

出版单位：浙江大学

作者：林正炎，苏中根编

页数：337

字数：30000

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

前言

The subject matter of probability theory is the mathematical analysis of random events, that is, of those empirical phenomena which do not have deterministic regularity but possess some statistical regularity. Probability theory, as science, originated in the middle of the seventeenth century with Pascal, Fermat and Huygens, although special calculations of probabilities in games of chance had been made earlier. The real history of probability theory begins with the work of James Bernoulli, *Ars Conjectandi* (The Art of Guessing) published .

<<概率论>>

内容概要

《概率论(英汉对照版)》以英文的形式介绍了高等学校概率论方面的知识。

The subject matter of probability theory is the mathematical analysis of random events, that is, of those empirical phenomena which do not have deterministic regularity but possess some statistical regularity.

书籍目录

- chapter 1 events and probabilities
 - 1.1 random phenomena and statistical regularity
 - 1.1.1 random phenomena
 - 1.1.2 the statistical definition of probability
 - 1.2 classical probability models
 - 1.2.1 sample points and sample spaces
 - 1.2.2 classical probability models
 - 1.2.3 geometric probability models
 - 1.3 the axiomatic definition of probability
 - 1.3.1 events
 - 1.3.2 probability space
 - 1.3.3 continuity of probability measure
 - 1.4 conditional probability and independent events
 - 1.4.1 conditional probability
 - 1.4.2 total probability formula and bayes ' rule
 - 1.4.3 independent events
- chapter 2 random variables and distribution functions
 - 2.1 discrete random variables
 - 2.1.1 the concept of random variables
 - 2.1.2 discrete random variables
 - 2.2 distribution functions and continuous random variables
 - 2.2.1 distribution functions
 - 2.2.2 continuous random variables and density functions
 - 2.2.3 typical continuous random variables
 - 2.3 random vectors
 - 2.3.1 discrete random vectors
 - 2.3.2 joint distribution functions
 - 2.3.3 continuous random vectors
 - 2.4 conditional distributions and independence
 - 2.4.1 conditional distributions
 - 2.4.2 independence of random variables
 - 2.5 functions of random variables
 - 2.5.1 functions of discrete random variables
 - 2.5.2 functions of continuous random variables
 - 2.5.3 functions of continuous random vectors
 - 2.5.4 transforms of random vectors
 - 2.5.5 important distributions in statistics
- chapter 3 numerical characteristics and characteristic functions
 - 3.1 mathematical expectations
 - 3.1.1 expectations for discrete random variables
 - 3.1.2 expectations of continuous random variables
- chapter 4 probability limit theorems
- appendix a distribution of typical random variables
- appendix b tables
