

<<预测学>>

图书基本信息

书名：<<预测学>>

13位ISBN编号：9787502120641

10位ISBN编号：7502120645

出版时间：1997-09-01

出版时间：石油工业出版社

作者：翁文波 著

页数：233

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<预测学>>

内容概要

“ With precautions there will be success , otherwise that will be failure ” , and “ He who has no anxious thoughts for the future will find trouble right at hand. “ These Chinese proverbs all reveal to people the im-portance of forecast. Mr. Weng Wenbo believed that mordern forecast should cover a wild range , such as social forecast ( e.g.population ) , technical forecast ( e.g. developing trend ) , economic Forecast ( e.g.ten - dency , market , management , etc ) , and military forecast ( e.g.strategy ) 。

## 书籍目录

Part I Philosophical Background  
 2. Cognition-Philosophical Basis of Forecast  
 3.1 Cognition and Knowledge  
 3.2 Development and Evolution  
 3.3 Rationale and Phenomenon, Rationalism and Phenomenalism  
 3.4 Part and Entirety, Fractions and Whole  
 3.5 Normal State and Abnormal State  
 3.7 Continuity and Discontinuity  
 Part II Theory  
 System  
 1.1 Conservation of Abstract System  
 1.3 Algebraic System  
 1.6 Binary Operations  
 1.7 Multiple Relations  
 1.8 Commensurability  
 2.1 Constitution of Physical System  
 2.2 Conservation of Physical System  
 2.4 How Are Days Counted  
 2.5 Physical Aspect of Natural Disasters  
 3.1 Information and Informative System  
 3.2 Informative Deduction, Exchange, and Feedback  
 3.3 Classification of Informative System  
 3.4 Symmetry and Conservation in Informative System  
 4. Distribution and Hypothetic Test for Distribution  
 4.1 Distribution  
 4.2 Distribution Function and Numerical Feature  
 4.3 Multivariate Composition of Numerical Distribution  
 4.4 Hypothetic Distribution and Hypothetic Test  
 4.5 Selection of Confidence Level  
 5. Forecast and Forecasting Methods  
 5.1 Common Concept of Forecast  
 5.2 Models and Process of Forecast  
 5.3 Statistic Forecast  
 5.4 Fitting  
 5.5 Informative Forecast  
 Part III Practice of Forecast  
 1. Cases of Forecast  
 1.1 Forecast of Meteorological Disasters  
 1.2 Forecast of China's Earthquake  
 1.3 Forecast of Earthquakes in Foreign Countries  
 2. Effect Analysis for Forecast of Natural Disasters  
 2.1 Methods of Estimation  
 2.2 Analysis of Effectiveness  
 Part IV Forecast and Operations Research  
 1. General Concept of Operations Research  
 2. Junction of Forecast Theory with Operations Research and Some Cases  
 2.1 Super Long-Range Forecast for Earthquake in Xinjiang Kurle Area, and Suggestions for Anti-Earthquake Measures in Base Construction  
 2.2 Forecasting and Programming of National Situations  
 Part V Forecast and Assessment  
 1. Forecast and Assessment  
 2. Forecast of World Oil and Natural Gas Production  
 3. About Natural Gas  
 3.1 New Knowledge about Natural Gas  
 3.2 Features of Gas Fields Distribution  
 4. Estimation for the Trend of Natural Gas Development  
 Epilogue My Final Words  
 1. About the Yellow Book  
 2. Application of Ancient Science-Reasoning of Luo Shu  
 3. Theoretical Foundation of Forecast  
 4. About Succession and Development of Forecasting Theory
