内容概要

《考研英语阅读题源》系列结合读者对于前两版的反馈意见，以及近年考研英语阅读的命题实际，选取了符合大家阅读偏好，同时也是考研英语阅读理解文章最集中的题源The Economist《经济学家》、Newsweek《新闻周刊》、Time《时代周刊》、The New York Times《纽约时报》4份期刊杂志，从这些为考研命题者所青睐的优秀原版期刊杂志中分别精选出50篇与考研英语阅读命题趋势相贴近的最新文章，具有较强的时效性。

本册为其中的“纽约时报分册”，分为科技类、健康类等五类。

作者简介

江涛，原北京外国语大学青年教师，英国、挪威、荷兰等多国留学背景。

从教多年。

受中国各大省、市100多所知名高校之邀，演讲千余场，以其极具感染力的激情，一针见血的点评，坦诚务实的作风广受学员赞誉。

主编《80天攻克雅思》、《英语大赢家》、《四六级晨读经典》等系列丛书，出版英语教学类书籍上千万字，畅销大陆。

远销台湾及东南亚地区。

2003年同语言学家、美籍华人彭铁城教授创办华盛顿国际英语学校；2005年创办卓成教育，首开中国民营教育机构多元化研究与大学师资培训之先河。

同年，受国家领导人全国人大常委会副委员长成思危接见。

书籍目录

Passage 7 Discovery May Help Treat Obesity

Passage 8 Stealing in Childhood Does Not a Criminal Make

Passage 9 Survey Finds High Fees Common in Medical Care

Passage 10 Genes Tied to Gap in Treatment of Hepatitis C

章节摘录

版权页：插图：Ramberg, formerly an executive at Volvo, said he left the company about a decade ago to start FordonsGas when he spotted an opportunity to promote the infrastructure needed to deliver biogas to drivers. "We're looking to certify the emissions from the entire life cycle of biogas production and use," Ramberg said. "But we already strongly believe that biogas is the best fuel for lower emissions - no discussion about it," he said. FordonsGas, which is half-owned by Dong Energy, a Danish company, makes a small profit and is continuing to invest in new biogas filling stations, Ramberg said. Biogas promoters acknowledge that the decision by Volvo to halt production of biogas cars had dealt the technology a serious blow. But they said decisions by Mercedes and Volkswagen to introduce a new models of biogas cars in Sweden this year, and rebates and tax breaks for drivers, could still invigorate sales of the cars and fuel. Biogas as a vehicle fuel is also available in Switzerland, France, Germany and Austria, but Sweden is the leading user in Europe, said Irmgard Herold, an analyst at New Energy Finance in London. Many people in Goteborg remain optimistic about the virtuous link they have created between waste and secure energy supplies. Ola Fredriksson, an engineer at Gryaab, the sewage facility in Goteborg, said that what an average person flushed down the toilet each year created enough biogas to drive 120 kilometers, or 75 miles. "If the oil price keeps on going up, and people are prepared to pay more for renewable energy, then it will make our company interested in producing more biogas," he said. "We have the capacity."
