## <<中国的全球环境变化人文因素研究>>

### 内容概要

This report is the first one of a series of national reports that CNC-IHDP will compile successively in the future. It describes the research programmes on HDGEC in China. The report consists of two parts. The first part introduces challenges, opportunities, and research strategies in China. The second part introduces the current progress and problems of the research, key scientific issues, priority research areas, measures of capacity building and cooperative opportunities from seven aspects, i.e., LUCC, Coastal Zone, industrial transformation, urbanization, human health, risk governance, and service of data and information.

书籍目录
