

<<非相对论量子力学>>

图书基本信息

书名：<<非相对论量子力学>>

13位ISBN编号：9787506242578

10位ISBN编号：7506242575

出版时间：1999-5

出版公司：世界图书出版公司

作者：L.D.Landau , E.M.Lifshitz 著

页数：677

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<非相对论量子力学>>

内容概要

THE previous edition of this volume was the last book on which I worked together with my teacher L. D. Landau. The revision and expansion that we then carried out was very considerable, and affected every chapter. For the third edition, naturally, much less revision was needed. Nevertheless, a fair amount of new material has been added, including some more problems, and relating both to recent research and to earlier results that have now become of greater significance.

## &lt;&lt;非相对论量子力学&gt;&gt;

## 书籍目录

From the Preface to the first English edition Preface to the second English edition Preface to the third Russian edition Editor's Preface to the fourth Russian edition Notation . THE BASIC CONCEPTS OF QUANTUM MECHANICS 1. The uncertainty principle 2. The principle of superposition 3. Operators 4. Addition and multiplication of operators 5. The continuous spectrum 6. The passage to the limiting case of classical mechanics 7. The wave function and measurements . ENERGY AND MOMENTUM 8. The Hamiltonian operator 9. The differentiation of operators with respect to time 10. Stationary states 11. Matrices 12. Transformation of matrices 13. The Heisenberg representation of operators 14. The density matrix 15. Momentum 16. Uncertainty relations . SCHRÖDINGER'S EQUATION 17. Schrödinger's equation 18. The fundamental properties of Schrödinger's equation 19. The current density 20. The variational principle 21. General properties of motion in one dimension 22. The potential well 23. The linear oscillator 24. Motion in a homogeneous field 25. The transmission coefficient . ANGULAR MOMENTUM 26. Angular momentum 27. Eigenvalues of the angular momentum 28. Eigenfunctions of the angular momentum 29. Matrix elements of vectors 30. Parity of a state 31. Addition of angular momenta . MOTION IN A CENTRALLY SYMMETRIC FIELD 32. Motion in a centrally symmetric field 33. Spherical waves 34. Resolution of a plane wave 35. Fall of a particle to the centre 36. Motion in a Coulomb field (spherical polar coordinates) 37. Motion in a Coulomb field (parabolic coordinates) VI. PERTURBATION THEORY 38. Perturbations independent of time 39. The secular equation 40. Perturbations depending on time 41. Transitions under a perturbation acting for a finite time 42. Transitions under the action of a periodic perturbation 43. Transitions in the continuous spectrum 44. The uncertainty relation for energy 45. Potential energy as a perturbation . THE QUASI-CLASSICAL CASE 46. The wave function in the quasi-classical case 47. Boundary conditions in the quasi-classical case 48. Bohr and Sommerfeld's quantization rule 49. Quasi-classical motion in a centrally symmetric field 50. Penetration through a potential barrier 51. Calculation of the quasi-classical matrix elements 52. The transition probability in the quasi-classical case 53. Transitions under the action of adiabatic perturbations SPIN 54. Spin 55. The spin operator 56. Spinors 57. The wave functions of particles with arbitrary spin 58. The operator of finite rotations 59. Partial polarization of particles 60. Time reversal and Kramers' theorem . IDENTITY OF PARTICLES 61. The principle of indistinguishability of similar particles 62. Exchange interaction ..... THE ATOM THE DIATOMIC MOLECULE XII THE THEORY OF SYMMETRY XIII POLYATOMIC MOLECULES XIV MOTION IN A MAGNETIC FIELD XV NUCLEAR STRUCTURE XVI ELASTIC COLLISIONS XVII INELASTIC COLLISIONS MATHEMATICAL APPENDICES Index
