内容概要

The Nobel Week is an annual, international event the highlight of which is the Nobel Prize Award Ceremony in the Concert Hall of Stockholm on December 10th, that is on the death-day of Alfred Nobel. It is a fascinating occurrence from both the scientific and social points of view, mainly because it puts the significance of science for society into bright focus. Only one item on the entire agenda is compulsory for the Laureates during this week, the Nobel Lecture. Thus, each Laureate has to deliver a lecture on the topic for which the prize has been awarded. The lectures are generally given on December 8th, that is before the Prize Award Ceremony, so that the Laureates can enjoy the festivities in a more relaxed way.

<<生理学或医学诺贝尔奖讲演集19>>

书籍目录

Foreword Preface
 1971 EARL W. SUTHERLAND Presentation Speech by Peter Reichard Studies on the Mechanisms of Hormone Action
 1972 GERALD M. EDELMAN AND RODNEY R. PORTER Presentation Speech by Sven Gard Biography of Gerald M. Edelman Antibody Structure and Molecular Immunology Biography of Rodney R. Porter Structural Studies of Immunoglobulins
