

<<金融数学方法>>

图书基本信息

书名：<<金融数学方法>>

13位ISBN编号：9787506266116

10位ISBN编号：7506266113

出版时间：2004-4

出版时间：世界图书出版公司(此信息作废)

作者：Ioannis Karatzas

页数：415

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<金融数学方法>>

内容概要

This book is intended for readers who are quite familiar with probability and stochastic processes but know little or nothing about finance. It is written in the definition/theorem/proof style of modern mathematics and attempts to explain as much of the finance motivation and terminology as possible.

书籍目录

Preface
 1 A Brownian Model of Financial Markets 1.1 Stocks and a Money Market 1.2 Portfolio and Gains Processes 1.3 Income and Wealth Processes 1.4 Arbitrage and Market Viability 1.5 Standard Financial Markets 1.6 Completeness of Financial Markets 1.7 Financial Markets with an Infinite Planning Horizon 1.8 Notes
 2 Contingent Claim Valuation in a Complete Market 2.1 Introduction 2.2 European Contingent Claims 2.3 Forward and Futures Contracts 2.4 European Options in a Constant-Coefficient Market 2.5 American Contingent Claims 2.6 The American Call Option 2.7 The American Put Option 2.8 Notes
 3 Single-Agent Consumption and Investment 3.1 Introduction 3.2 The Financial Market 3.3 Consumption and Portfolio Processes 3.4 Utility Functions 3.5 The Optimization Problems 3.6 Utility from Consumption and Terminal Wealth 3.7 Utility from Consumption or Terminal Wealth 3.8 Deterministic Coefficients 3.9 Consumption and Investment on an Infinite Horizon 3.10 Maximization of the Growth Rate of Wealth 3.11 Notes
 4 Equilibrium in a Complete Market 4.1 Introduction 4.2 Agents, Endowments, and Utility Functions 4.3 The Financial Market: Consumption and Portfolio Processes 4.4 The Individual Optimization Problems 4.5 Equilibrium and the Representative Agent 4.6 Existence and Uniqueness of Equilibrium 4.7 Examples 4.8 Notes
 5 Contingent Claims in Incomplete Markets 5.1 Introduction 5.2 The Model 5.3 Upper Hedging Price 5.4 Convex Sets and Support Functions 5.5 A Family of Auxiliary Markets 5.6 The Main Hedging Result 5.7 Upper Hedging with Constant Coefficients 5.8 Optimal Dual Processes 5.9 Lower Hedging Price 5.10 Lower Hedging with Constant Coefficients 5.11 Notes
 6 Constrained Consumption and Investment 6.1 Introduction 6.2 Utility Maximization with Constraints 6.3 A Family of Unconstrained Problems 6.4 Equivalent Optimality Conditions 6.5 Duality and Existence 6.6 Deterministic Coefficients, Cone Constraints 6.7 Incomplete Markets 6.8 Higher Interest Rate for Borrowing Than for Investing 6.9 Notes
 Appendix A. Essential Supremum of a Family of Random Variables
 Appendix B. On the Model of Section 1.1
 Appendix C. On Theorem 6.4.1
 Appendix D. Optimal Stopping for Continuous-Parameter Processes
 Appendix E. The Clark Formula
