

<<化学工程师用的经验法则>>

图书基本信息

书名：<<化学工程师用的经验法则>>

13位ISBN编号：9787506272551

10位ISBN编号：7506272555

出版时间：2005-4

出版时间：世界图书出版公司

作者：C.Branan

页数：426

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<化学工程师用的经验法则>>

内容概要

Chemical Equipment : Here under one cover are practical tips, handy formulas, correlations, curves, charts, tables, and shortcut methods that will save engineers valuable time and effort. -This text refers to an out of print or unavailable edition of this title. Review : "Branan's useful and convenient handbook for chemical and process engineers (at a bargain price) will be much appreciated by students and practitioners..." American Reference Books Annual "...this book is a handy reference tool for preliminary designs, and has some very useful information on several aspects of plant operation." Chemical Engineering "Carl Branans book provides a huge amount of valuable information on a wide variety of chemical engineering applications from sizing pipelines to economic evaluation of process options."

<<化学工程师用的经验法则>>

书籍目录

SECTION ONE Equipment Design
 1: Fluid Flow, 2 Velocity head Piping pressure drop Equivalent length Recommended velocities Two phase flow Compressible flow Sonic velocity Metering Control valves Safety relief valves
 2: Heat Exchangers, 19 TEMA Selection guides Pressure drop shell and tube Temperature difference Shell diameter Shellside velocity maximum Nozzle velocity maximum Heat transfer coefficients Fouling resistances Metal resistances Vacuum condensers
 Air-cooled heat exchangers: forced vs induced draft Air-cooled heat exchangers: pressure drop air side
 Air-cooled heat exchangers: rough rating Air-cooled heat exchangers: temperature control Miscellaneous rules of thumb
 3: Fractionators, 49 Introduction Relative volatility Minimum reflux Minimum stages Actual reflux and actual theoretical stages Reflux to feed ratio Actual trays Graphical methods Tray efficiency Diameter of bubble cap trays Diameter of sieve/valve trays (F factor) Diameter of sieve/valve trays (Smith) Diameter of sieve/valve trays (Lieberman) Diameter of ballast trays Diameter of fractionators general
 Control schemes Optimization techniques Reboilers Packed columns
 4: Absorbers, 97 Introduction Hydrocarbon absorber design Hydrocarbon absorbers, optimization Inorganic type
 5: Pumps, 104 Affinity laws Horsepower Efficiency Minimum flow General suction system Suction system NPSH available Suction system NPSH for studies Suction system NPSH with dissolved gas Larger pumpeller Construction materials
 SECTION TWO Process Design
 SECTION THREE Plant Design
 SECTION FOUR Operations
 Appendixes
 Index, 423
