书籍目录

Preface Using This Book
Part I: Finite Groups
1 Representations of Finite Groups
2 Characters
3 Examples; Induced Representations; Group Algebras; Real Representation
4 Representations of S_n ; Young Diagrams and Frobenius's Character Formula
5 Representations of GL_n and GL_2
6 Weyl's Construction
Part II: Lie Groups and Lie Algebras
7 Lie Groups
8 Lie Algebras and Lie Groups
9 Initial Classification of Lie Algebras
10 Lie Algebras in Dimensions One, Two, and Three
11 Representations of sl_2
12 Representations of sl_3 , part I
13 Representations of sl_3 , Part II: Mainly Lots of Examples
Part III: The Classical Lie Algebras and Their Representations
14 The General Set-up: Analyzing the Structure and Representations of an Arbitrary Semisimple Lie Algebra
15 sl_4 and sl_4
16 Symplectic Lie Algebras
17 sp_6 AND sp_{2n}
18 Orthogonal Lie Algebras
20 Spin Representations OF
Part IV: Lie Theory
21 The Classification of Complex Simple Lie Algebras
22 and Other Exception Lie Algebras
23 Complex Lie Groups; Characters
24 Weyl Character Formula
25 More Character Fomulas
26 Real Lie Algebras and Lie Groups
Appendices
Hints, Answers, and References
Bibliography
Index of Symbols
