

<<高维守恒律与可压缩流体>>

图书基本信息

书名：<<高维守恒律与可压缩流体>>

13位ISBN编号：9787506273169

10位ISBN编号：7506273160

出版时间：2006-11

出版时间：世界图书出版公司

作者：马伊达

页数：159

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<高维守恒律与可压缩流体>>

### 内容概要

这是一部研究高维守恒律与可压缩流体方面的重要著作，书中介绍了高维守恒律的特性，深入探讨了可压缩流体理论，其中所涉及的许多问题是当今相关领域研究的热门课题。

<<高维守恒律与可压缩流体>>

作者简介

作者：(德)马伊达

<<高维守恒律与可压缩流体>>

书籍目录

ACKNOWLEDGMENTS CHAPTER 1. INTRODUCTION 1.1. Some Physical Examples of Systems of Conservation Laws 1.2. The Importance Of Dissipative Mechanisms 1.3. The Common Structure of the Physical Systems Of Conservation Laws and Friedrichs' Theory Of Symmetric Systems 1.4. Linear and Nonlinear Wave Propagation and the Theory Of Nonlinear Simple Waves 1.5. Weakly Nonlinear Asymptotics—Nonlinear Geometric Optics 1.6. A Rigorous Justification Of Weakly Nonlinear Asymptotics in a Special Case 1.7. Some Additional Applications Of Weakly Nonlinear Asymptotics in the Modeling of Complex Systems Bibliography for Chapter 1 CHAPTER 2. SMOOTH SOLUTIONS AND THE EQUATIONS OF INCOMPRESSIBLE FLUID FLOW 2.1. The Local Existence Of Smooth Solutions for Systems Of Conservation Laws 2.2. A Continuation Principle for Smooth Solutions 2.3. Uniformly Local Sobolev Spaces 2.4. Compressible and Incompressible Fluid Flow 2.5. Equations for Low Mach Number Combustion Bibliography for Chapter 2 CHAPTER 3. THE FORMATION OF SHOCK WAVES IN SMOOTH SOLUTIONS 3.1. Shock Formation for Scalar Laws in Several Space Variables 3.2. Shock Formation in Plane Wave Solutions Of General moment Systems 3.3. Detailed Results on Shock Formation for  $2 \times 2$  Systems 3.4. Breakdown for a Quasi-Linear Wave Equation in 3-D 3.5. Some Open Problems Involving Shock Formation in Smooth Solutions Bibliography for Chapter 3 CHAPTER 4. THE EXISTENCE AND STABILITY OF SHOCK FRONTS IN SEVERAL SPACE VARIABLES 4.1. Nonlinear Discontinuous Progressing Waves in Several Variables—Shock Front Initial Data 4.2. Some Theorems Guaranteeing the Existence of Shock Fronts CHAPTER 4. (cont.) 4.3. Linearization of Shock Fronts 4.4. An Introduction to Hyperbolic Mixed Problems 4.5. Quantitative Estimates for Linearized Shock Fronts 4.6. Some open Problems in Multi-D Shock Wave Theory Bibliography for Chapter 4 INDEX
