

<<现代分析教程>>

图书基本信息

书名：<<现代分析教程>>

13位ISBN编号：9787506292115

10位ISBN编号：7506292114

出版时间：2008-5

出版时间：维塔克 (Whittaker E.T.) 世界图书出版公司 (2008-05出版)

作者：维塔克

页数：608

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

内容概要

ADVANTAGE has been taken of the preparation of the fourth edition of this work to add a few additional referens and to make a number of corrections of minor errors. Our thanks are due to a number of our readers for pointing out errors and misprints , and in particular we are grateful to Mr E.T.Copson , Lecturer in mathematics in the University Edinburgh , for the trouble which he has taken in supplying us with a somewhat lenthly list.

作者简介

作者：(英国)维塔克(Whittaker E.T.)

书籍目录

PART I. THE PROCESSES OF ANALYSIS. CHAPTER I Complex Numbers II The Theory of Convergence III Continuous Functions and Uniform Convergence IV The Theory of Riemann Integration V The fundamental properties of Analytic Functions; Taylor's, Lsnrent's, and Liouville's Theorems VI The Theory of Residues; application to the evaluatiou of Definite Integrals VII The expansion of functions in Infinite Series VIII Asymptotic Expansions and Summab]e Series IX Fourier Series and Trigonometrical Series X Linear Differential Equations XI Integral Equations PART II. THE TRANSCENDENTAL FUNCTIONS XII The Gamma Function.. XIII The Zeta Function of Riemann XIV The Hypergeometric Function XV Legendre Functions.....
