<<Apache权威指南>>

内容概要

《Apache权威指南》第二版对前版作了全面的修订。

新增加的内容包括：

Apache 1.3.3新版的内容

Apache对Win32系统的支持文档

由Andrew Ford编辑的、可撕下的Apache 1.3.3 1.3.4版速查表

重新修订并扩展过的索引表

有第二版在于，不熟悉Apache的Web管理员将可以通过书中的演示教程迅速掌握它，有经验的管理员和CGI程序员将会发现附录部分是不可缺少的，而系统程序员将会立刻翻到有关API和Apache模块部分的章节。

本书是世界上最流行的Web服务器的基本义档。

本书是围绕一个样板网站的建立以及对其功能的逐步完善的过程来进行组织的。

各章节分别讨论了以下内容：

获取及编译Apache

在Unix和Windows系统上配置和运行Apache

CGI编程

验证与安全

编索引、重定向、代理和SSI

登录

API及编写Apache模块

本书附带一张光盘，包含了Apache1.3.3的Unix和Win32版本和书中使用的样板网站的所有内容。

<<Apache权威指南>>

作者简介

Ben Laurie从1978年起一直从事程序员职业，他还是Apache核心小组的成员之一。

Peter Laurie是一名自由职业专栏作家，也是几部计算机专著的作者。

书籍目录

Peface

1. Getting started

How Does Apache Work?

What to Know About TCP/IP

How Does Apache Use TCP/IP?

What the Client Does

What Happens at the Server End?

Which Unix?

Which Apache?

Making Apache Under Unix

Apache Under Windows

Apache Under BS2000/OSD and AS/400

I Our First Web Site

What Is a Web Site?

Apache's Flags

site.toddle

Setting Up a Unix Server

Setting Up a Win32 Server

3. Toward a Real Web Site

More and Better Web Sites: site.simple

Butterthlies, Inc., Gets Going

Block Directives

Other Directives

Two Sites and Apache

Controlling Virtual Hosts on Unix

Controlling Virtual Hosts on Win32

Virtual Hosts

Two Copies of Apache

HTTP Response Headers

Options

Restarts

.htaccess

CERN Metafiles

Expirations

4. Common Gateway Interface(CGI)

Turning the Brochure into a Form

Writing and Executing Scripts

Script Directives

Useftl Scripts

Debugging Scripts

Setting Environment Variables

suEXEC on Unix

Handlers

Actions

5. Autbentication

<<Apache权威指南>>

- Authentication Protocol
- Authentication Directives
- Passwords Under Unix
- Passwords Under Win32
- New Order Form
- Order, Allow, and Deny
- Digest Authentication
- Anonymous Access
- Experiments
- Automatic User Information
- Using .htaccess Files
- Overrides
- 6 MIME, Content and Language Negotiation
- MIME Types
- Content Negotiation
- Language Negotiation
- Type Maps
- Browsers and HTTP/1.1
- 7. Indexing
- Making Better Indexes in Apache
- Making Our Own Indexes
- Imagemaps
- 8 Redirection
- Rewrite
- Speling
- 9. Proxy Server
- Proxy Directives
- Caching
- Setup
- 10. Server-Side Includes
- File Size
- File Modification Time
- Includes
- Execute CGI
- Echo
- XBitHack
- XSSI
- 11. What's Going On?
- Status
- Server Status
- Server Info
- Logging the Action
- 12. Extra Modules
- Authentication
- Blocking Access
- Counters
- Faster CGI Programs

<<Apache权威指南>>

- FrontPage from Microsoft
- Languages and Internationalization
- Server-Side Scripting
- Throttling Connections
- URL Rewriting
- Miscellaneous
- MIME Magic
- DSO
- 13. Security
 - Internal and External Users
 - Apache's Security Precautions
 - Binary Signatures, Virtual Cash
 - Firewalls
 - Legal Issues
 - Secure Sockets Layer: How to Do It
 - Apache-SSL's Directives
 - Cipher Suites
 - SSL and CGI
- 14. The APache API
 - Pools
 - Per-Server Configuration
 - Per-Directory Configuration
 - PerRCquest InfOrmation
 - Access to Configuration and Request Information
 - Functions
- 15. Writing Apache Modules
 - Overview
 - Status Codes
 - The Module Structure
 - A Complete Example
 - General Hints
 - A. SuPPort Organizations
 - B. The ecbo Program
 - C. NCSA and APache ComPatibility
 - D. SSL Protocol
 - E. sample Apache Log
- Index
