章节摘录

New York is a very large city with 8 million people. How do so many people move about the city on their way to work and school so, we should know something about its transport. In New York you can travel about the city by subway, bus, taxi and car. The subway runs on the railroad lines under the city. It crosses the city at different points and goes to all parts of the city. Travelling by subway is the fastest way to get around the city.

The second way to travel around the city is going by public bus. Its a slower way to travel. This is because the bus moves in road traffic which is often heavy. You can also travel around the city by taxi. This is the most expensive way, but the taxi will take you to the place you wish to go to. If traffic is heavy, the taxi will be slow. During the mornings and afternoons, there is the "rush hour". This is the time when the traffic is very heavy with people going to and from work. The last way to get around New York is using your own car. However, its not easy for you to drive, especially when you are driving in the "rush hour". If there is an accident on the road, you will have to wait for a long time.
