章节摘录

What's that ?

This story ?

Oh , just all little look at small talk. You know; those seem-ingly meaningless conversations you have dozens of times a day. Maybe you're waiting forthe elevator. Or in a line at the bank. It all seems pretty trivial. Idle chatter about trafficroesn't do much more than fill the air with empty words that are quickly forgotten. But you should know that small talk actually has a big place in our lives. Pat Oliver , assistant professor on arts , says that , "Left unchecked , small talk can bean invasion. It's so powerful. It does something to you. " "Every morning after spending anhour and a half on the freeway I start the day with small talk with my secretary , " Oliver says , "If I don't make small connection with another person , I can't work. " What causes it ?

As a rule , you're either trying to force something into your life , or you're using conversation as an invisible force field to keep them out. You can be wanting to connect withanother person , and small talk is your introduction to more meaningful conversation. The way people use small talk is usually determined by where they happen to be at thetime. Take the elevator , for instance. Now there's prime territory. Nobody knows anyoneand there's no reason no start a conversation , but invariably , someone does. Making con-versation in such peaceful social settings , according to Oliver , "can confirm your territory.It's a way of feeling like and accepted. "
