<<安徒生童话>>

内容概要

Such an original species of writing as that in which Andersen excelled does not burst full-blown upon the world. It is the result of many experiments, many accidents, even, perhaps, of some blunderings. Andersen did not set out deliberately to be a teller of fairy stories, much less did he expect or desire to be mainly known as the composer of these srnaating, as he called them, of these trifles or bagatelles. He set out in life intending to be a serious poet, a writer of five-act dramas, a novelist of passion and society.

章节摘录

版权页：插图：gar away from here, in the land where the swallows fly to when we have winter, lived a king, who had eleven sons and one daughter, whose name was Elisa. The eleven brothers, who were all princes, went to school with a star on their breast and a sabre by their side ; they wrote on golden slates with diamond pencils, and knew their lessons by heart just as well as if they had read them from a book. One could see at once that they were princes. Elisa, the sister, sat on a small footstool of plate glass and had a picture book which cost as much as half the kingdom. Yes, those children led indeed a happy life, but it was not always to be so. Their father, who was king of the whole country, married a wicked queen, who was not at all kind to the poor children. On the very first day this became apparent to them. There were great festivities all over the palace, and the children were playing at "having company," but instead of their getting as usual all the cakes and roasted apples that could be had, the queen only gave them sand in a teacup and said they might pretend it was something nice.
