章节摘录

Aims of the course The course aims to enable students to develop a functional competence in English that will be of practical value to them at school, for their subsequent careers and in their personal lives. A major feature of this course is that it does not just set language tasks for practice, but it teaches the skills necessary to deal with the tasks. The course pays special attention to developing language skills and subskills, to teaching exam techniques and to providing practice in exam-style exercises and tasks.

Organization of Students Book Senior High 3A The Students Book is divided into 5 chapters. Each chapter is divided into six sections — Reading, Listening or Integrated Skills, Language, Speaking, Writing and More Language Input or Mid-term Progress File. Each chapter is centred on a topic that links together the different sections of the chapter. The main passages serve to contextualize the vocabulary and language that are later exploited in the Language and other sections. The chapter topics have been carefully selected to appeal to teenage students of both sexes, and contain a wide variety of subject matter. Some topics are close to students' daily lives, whereas others fulfil the aim that English should present a window on the world. The topics are open-ended and ongoing, and it is hoped that many teachers will wish to supplement the material in each chapter by introducing into the classroom some recent stories or news items related to the chapter topic. This will help students to appreciate the relevance of their language-learning to the real world.
