内容概要

《新理念英语阅读》是由上海外语教育出版社从美国Cengage Learning出版集团引进改编的一套中小学英语读物。

这套读物题材广泛，话题丰富；既有引人入胜、趣味无穷的故事，又有知识丰富、包罗万象的科普读物。

把语言输入和知识输入融合在一起，让学生体验阅读的乐趣。

书籍目录

我希望
宇宙垃圾、陨星与彗星
地震
电
逃离泥石流
蝗灾
词汇表
答案

章节摘录

In their work on atoms , scientists wondered what kept the electrons spinning around the nucleus. They discovered that the force of attraction between the positively charged protons and negatively charged electrons keeps the electrons spinning. This made sense to the scientists because they had observed that positively charged things and negatively charged things are attracted to each other. But , what really interested scientists about electrons is that they can move between atoms and as a result , create electricity. Today , scientists and engineers use this knowledge to come up with ways to get electrons to move between atoms to make new and amazing inventions that can make our lives easier.
