<<英语课程与教学论>>

内容概要

《英语课程与教学论》世纪之初，人们热心地描绘着新的时代，众说纷纭。
但无论怎样去述说，人们都会注意到这样一个事实：知识更新的速度在不断加快，信息传播的能力在不断提高。
虽然这个事实是客观存在的，但是我们在情感上却很难去欣赏，并认为这是一件好事情。
因为这个事实意味着时代变化的节奏要加快，意味着一个不甘寂寞的人要付出更多的艰辛。

<<英语课程与教学论>>

章节摘录

Introduction on CALL In the last few years the number of teachers using Computer-assistedLanguage Learning （CALL） has increased markedly and numerous articles havebeen written about the role of technology in education in the 21st century.Although the potential of the Internet for educational use has not been fullyexplored yet and the average school still makes limited use of computers, it isobvious that we have entered a new information age in which the links betweentechnology and TEFL have already been established. In the early 90s education started being affected by the introduction of wordprocessors in schools, colleges and universities. This mainly had to do withwritten assignments. The development of the.Internet brought about a revolutionin the teachers perspective, as the teaching tools offered through the Internetwere gradually becoming more reliable. Nowadays, the Internet is gainingimmense popularity in foreign language teaching and more and more educatorsand learners are embracing it. Why use CALL ?

Research and practice suggest that, appropriately implemented, network-based technology can contribute significantly to: Experiential Learning The World Wide Web makes it possible for students to tackle a huge amountof human experience. In such a way, they can learn by doing things themselves.They become the creators not just the receivers of knowledge. As the wayinformation is presented is not linear, users develop thinking skills and choosewhat to explore. Motivation Computers are most popular among students either because they areassociated with fun and games or because they are considered to be fashionable.Student motivation is therefore increased, especially whenever a variety.
