

<<轮机工程材料>>

图书基本信息

书名：<<轮机工程材料>>

13位ISBN编号：9787563226740

10位ISBN编号：7563226745

出版时间：2012-3

出版时间：严志军[等] 大连海事学院出版社 (2012-03出版)

作者：严志军

页数：221

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<轮机工程材料>>

### 内容概要

轮机工程对材料的选用有其特殊的要求，例如，柴油机活塞和连杆零件需要承受交变高机械载荷；排气阀和增压器废气涡轮叶片需要在较高温度下工作；在选用材料时，还需要考虑工作环境的影响。

材料选用不当往往意味着设备的故障和事故，造成经济损失甚至人身伤害。

《轮机工程材料（英文版）》适合于从事轮机工程行业的人员，具备一定的工程材料选用知识和能力是十分必要的。

## 书籍目录

Chapter I Introduction 1.1 States of materials 1.2 Bonds of solid materials 1.3 Types of engineering materials 1.4 Exercises Chapter 2 Manufacture of Iron and Steel Products 2.1 Fabrication of iron and steel materials 2.2 Products of iron and steel 2.3 Exercises Chapter 3 Properties of Metals and Testing Methods 3.1 Strength and ductility of metal 3.2 Hardness of metal 3.3 Toughness of metal 3.4 Fatigue strength of metal 3.5 Some mechanical properties at high temperature 3.6 Other properties of metal 3.7 Exercises Chapter 4 Crystal Structures and Solidification of Metal 4.1 Crystal structures of metals 4.2 Imperfection in metallic solids 4.3 Solidification and crystallization of metal 4.4 Exercises Chapter 5 Plastic Deformation and Recrystallization of Metals 5.1 Plastic deformation of single crystalline metals 5.2 Plastic deformation of polycrystalline metals 5.3 Mechanisms of strengthening in metals 5.4 Changes of metal at elevated temperature 5.5 Cold and hot working 5.6 Exercises Chapter 6 Phase Diagrams 6.1 Phase diagrams of alloy 6.2 Iron—iron carbide diagram 6.3 Different reactions of Fe-C alloys during cooling 6.4 The effects of alloying elements on iron alloy phase diagrams 6.5 Exercises Chapter 7 Heat Treatment of Metal 7.1 Structural changes of steel when heating 7.2 Structural changes of steel when cooling 7.3 Annealing and normalizing of steel 7.4 Quenching and tempering of metal 7.5 Surface modification and heat treatment 7.6 Exercises Chapter 8 Industrial Steels 8.1 Carbon and alloying elements in steel 8.2 Carbon steel grades 8.3 Alloy structural steel grades 8.4 Alloy tool steel grades 8.5 Special steel grades 8.6 Exercises Chapter 9 Cast Iron 9.1 Introduction of cast iron 9.2 Gray cast iron 9.3 Malleable cast iron 9.4 Ductile iron 9.5 Compacted graphite iron 9.6 Special purpose cast iron 9.7 Exercises Chapter 10 Non Ferrous Metals and Alloys 10.1 Copper and alloys 10.2 Aluminum and alloys 10.3 Titanium and alloys 10.4 Bearing alloys 10.5 Exercises Chapter 11 Nonmetallic Materials 11.1 Polymer material 11.2 Plastic and rubber material 11.3 Ceramic material 11.4 Composite material 11.5 Exercises Chapter 12 Application of Material for Marine Engineering 12.1 Crankshaft materials 12.2 Connecting rod materials 12.3 Cylinder liner materials 12.4 Piston materials 12.5 Gudgeon pin materials 12.6 Piston ring materials 12.7 Hot valve materials 12.8 Propeller materials 12.9 Rolling bearing materials 12.10 Turbocharger nozzle ring and blades 12.11 Exercises References
